Total for All Procedures	83,476	84.1	15,825	15.9	99,301

Outpatient procedure records include all outpatient records with procedures in the ICD-9-CM code range 00.0-86.99.
Procedure groups are created using the first procedure on each record which is in the defined code range, grouped by the first two digits of the procedure code.
These tables are not comparable to tables published in the 2002 Monograph or prior years because of the expanded definition of outpatient procedures (see discussion in the User's Guide to Outpatient Procedure Tables for details).

Outpatient procedure records include all outpatient records with procedures in the ICD-9-CM code range 00.0-86.99.
Charge data should be used with caution. See discussion in the User's Guide to Outpatient Procedure Tables for details.
Records with missing charges are included in the number of procedures reported but are excluded from the average charges calculation.
Top 20 procedure groups are based on the combined outpatient totals.
Procedure groups are created using the first procedure on each record which is in the defined code range, grouped by the first two digits of the procedure code.
These tables are not comparable to tables published in the 2002 Monograph or prior years because of the expanded definition of outpatient procedures (see discussion in the User's Guide to Outpatient Procedure Tables for details).

Procedure groups are created from first procedure in ICD-9-CM code range 00.0 - 86.99, grouped by first two digits of procedure code.
Total for age/sex groups do not equal total for all outpatient procedures due to 1 case with sex missing.
These tables are not comparable to tables published in the 2002 Monograph or prior years because of the expanded definition of outpatient procedures (see discussion in the User's Guide to Outpatient Procedure Tables for details).

Charge data should be used with caution. See discussion in the User's Guide to Outpatient Procedure Tables for details.
Records with missing charges are included in the number of procedures reported but are excluded from the average charges calculation.
Procedure groups are created using the first procedure on each record which is in the ICD-9-CM code range 00.0 - 86.99, grouped by first two digits of procedure code.
"Other" payer includes self-pay, no charge, and other sources of payment
These tables are not comparable to tables published in the 2002 Monograph or prior years because of the expanded definition of outpatient procedures (see discussion in the User's Guide to Outpatient Procedure Tables for details).

Charge data should be used with caution. See discussion in the User's Guide to Outpatient Procedure Tables for details.
Records with missing charges are included in the number of procedures reported but excluded from the average charges.
Procedure groups are created using the first procedure on each record which is in the ICD-9-CM code range 00.0 - 86.99, grouped by first two digits of procedure code.
These tables are not comparable to tables published in the 2002 Monograph or prior years because of the expanded definition of outpatient procedures (see discussion in the User's Guide to Outpatient Procedure Tables for details).

Procedure groups are created using the first procedure on each record which is in the ICD-9-CM code range 00.0-86.99, grouped by the first two digits of the procedure code.

These tables are not comparable to tables published in the 2002 Monograph or prior years because of the expanded definition of outpatient procedures (see discussion in the User's Guide to Outpatient Procedure Tables for details).

Top 20 procedure groups are based on the combined Vermont, New Hampshire, and New York outpatient procedure totals.
Procedure groups are created using the first procedure on each record which is in the ICD-9-CM code range 00.0-86.99, grouped by the first two digits of the procedure code.
New Hampshire data are provided by the New Hampshire Department of Health and Human Services.
New Hampshire outpatient data do not include admission source information. Therefore, all outpatient records with a procedure in the correct ICD-9-CM code range are included.
New York data are provided by the New York Department of Health.
These tables are not comparable to tables published in the 2002 Monograph or prior years because of the expanded definition of outpatient procedures (see discussion in the User's Guide to Outpatient Procedure Tables for details).
