Table 1B - Count of Top 2020 Inpatient Diagnoses

The counts displayed include each community hospital's top inpatient diagnoses by volume. These pages provide the number of cases for these diagnoses for the period of 10/1/2019 to 9/30/2020. Hospital System Number of Cases and Average Gross Charges include all hospitals. For individual hospitals, diagnoses having fewer than 15 cases are excluded. Blanks in the table indicate that the hospital has fewer than 15 cases for that diagnosis or the hospital does not admit patients with that particular diagnosis. The hospital, however, may admit patients with similar diagnoses under a different code which may not be shown. Treating a given diagnosis may entail more than one procedure. Please call the hospital for more information.

¹ Based on "Medicare Severity - Diagnostic Related Group" (MS-DRG), a code that defines an inpatient diagnosis. Treating a given diagnosis may entail more than one procedure. Major Diagnostic Category (MDC) is a grouping of similar MS DRGs, such as all those affecting a given organ system of the body.

² System Number of Cases includes the number of cases for all hospitals with charges. Records with zero charges are not included.

³ System Average Gross Charge is an average based on all hospital cases with charges.
