

IMR Inventory Now Automatically Loaded From McKesson Shipping Logs

- It's easier than ever to enter immunizations into the IMR.
- Beginning 10/29, when state-supplied vaccine is delivered to your office from McKesson, the details (lot numbers, manufacturer, expiration date) will be loaded into your Vaccine Inventory.
- You CAN still enter any additional vaccine you may have in your office into the system. Just select Add New Vaccine and complete the fields.

The screenshot shows the 'Individual Profile' page for a patient named River, Ompompanoosuc. The 'Immunization Detail' form is displayed with the following fields: Vaccine: DTaP; Date: 10/25/11; Route: Intramuscular; Site: (dropdown); Exp. Date: 1/1/2013; Target Group: (dropdown); Practice/Source: Vermont Department of Health; Person: (dropdown); MFR: GlaxoSmithKline; Lot: (dropdown menu with options xx33xax, 66666666666666, and 66633333333333, and a text input field 'Enter different Lot number'); VFC Eligibility: (checkboxes for Medicaid/Dr. Dynasaur, Asian Native or Native American, No Insurance, Not VFC Eligible); Vaccine Information Materials Given: (checkboxes for various vaccines and dates); Date VIS Given: 10/25/11. A red arrow points to the Lot dropdown menu with the text 'Choose lot #'.

- How to enter an immunization:
 - Enter date, then select ENTER. Vaccine Detail Screen appears.
 - Check Lot number right away– if it does not match the lot number you administered, use the drop down arrow (red arrow above) to locate the right lot number.
 - Select SITE of vaccine.
 - Enter person who administered vaccine.
 - Select VFC eligibility.
 - Select SAVE at bottom of screen.
