

Vaccination with JYNNEOS can be considered for persons determined to be at high risk for infection to prevent Mpox. All providers can request JYNNEOS vaccine.

## Ordering JYNNEOS

- Requests for JYNNEOS vaccine should be directed to: [AHS.VDHImmunizationProgram@vermont.gov](mailto:AHS.VDHImmunizationProgram@vermont.gov)
- This vaccine is ordered differently than routine vaccines.
- Please include the following in your email request:
  - Subject line “JYNNEOS vaccine order request”
  - Number of vials requested.
  - Number of syringes requested.
- Any enrolled provider can obtain JYNNEOS, it must be stored in a monitored and approved unit.
- Upon ordering of the JYNNEOS vaccine a Provider agreement will be emailed, and upon receiving the vaccine the provider agreement will be printed and included with the delivery.
- This agreement is not to be signed but is a federal binding agreement that you will uphold. Please review the CDC's Mpox Vaccination Program Provider Agreement website for any updates.

### Remember:

**Providers are encouraged to be less concerned with waste, and more liberal with ordering. Please aim to supply your clinic for about 5 weeks.**

## Storage & Handling

- All deliveries are shipped from the Depot and transferred at refrigerator temperature (2-8°C) the BUD date (8 weeks) will be clearly labeled on the box.
- JYNNEOS is very sensitive to cold temperatures. If there is an excursion, please follow the [Temperature Excursion Protocol](#). In addition, as this vaccine is not included in the VIMS inventory, in the event of an excursion please notify the public health specialist you are working with that you had doses of JYNNEOS.

## Administration of JYNNEOS

- 2 dose series given 28 days apart.
- Can be given SQ 0.5ml to any age
- Can be given ID 0.1 ml to ages 18+
