

Ready Check Inject Equipment Checklist

- Ready, Check, Inject Instruction card (one per injection set)
- Injection set (including the following):
 - 1 mL syringe
 - * Larger volumes syringes are not allowed at EMT level.
 - * Syringe may be Luer lock or Luer slip tip.
 - 1 inch -1.5-inch safety needle
 - 1mL vial of epinephrine - must be 1mg/1mL concentration (1:1000)
 - * Epinephrine in ampule form is not allowed at the EMT level.
 - * Larger volumes or multi dose vials are not allowed at the EMT level.
 - Alcohol prep pads
 - Bandaid
- Consider the additional need for sharps disposal and personal protective equipment.

We recommend that EMT injection supplies be kept separate from ALS supplies to avoid any confusion with regard to scope of practice and the unique EMT protocol.
