

NNEPQIN June 6, 2019  
From Vermont's Lake Champlain to the  
Rocky Coast of Maine:  
What does PRAMS Data Tell Us About  
Mothers and Babies in Northern New  
England?

# Objectives

- What is PRAMS?
- What PRAMS says about the experiences of women who have had a recent birth in northern New England and elsewhere.
- Generate ideas of how you might use PRAMS data to improve health outcomes in your state.

## Goal of PRAMS

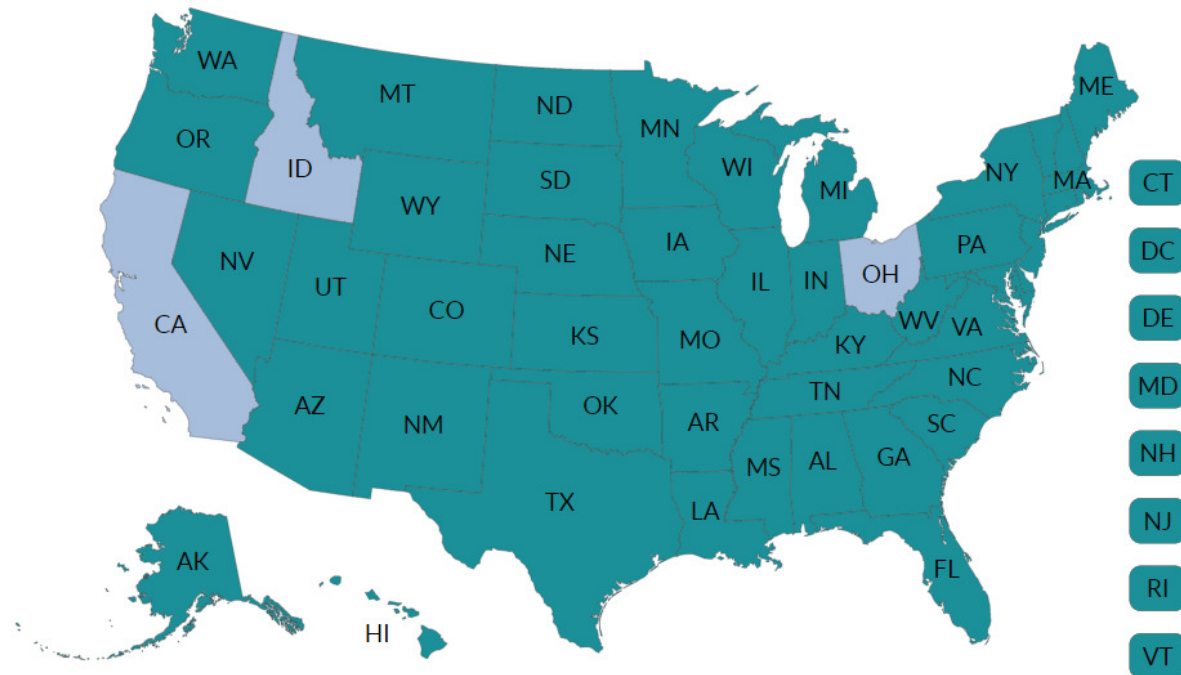

- **Pregnancy Risk Assessment Monitoring System**
- Developed by CDC in 1987
  - To reduce infant morbidity and mortality and promote maternal health by influencing MCH programs, policies, and maternal behaviors
  - Improving the health of mothers and infants
  - Provides state-specific data about pregnancy and the first few months after birth

# PRAMS Overview

PRAMS now covers

- 47 States
- Washington DC
- Puerto Rico
- NYC

And represents 83%  
of US live births

Cities NYC

Territories PR

# PRAMS Data Collection

## □ Data sources

### ▣ Birth Certificate data

- Sample frame: each state's stratified sample design
- Population demographics- live births to state residents

### ▣ PRAMS Questionnaire data (self reported data by mail or phone)

- Currently on eighth version
- Includes
  - Core questions: items asked by all PRAMS sites
  - State-added options

## PRAMS in Northern New England

- Maine: Began in 1988
- Vermont: 2001
- New Hampshire: 2013

## PRAMS NNE: 2017 Births & Sample

2017	Births	Sample Size
Maine	12,298	1,459
New Hampshire	12,116	1,079
Vermont	5,655	1,277

**Each State's Data is weighted by CDC to reflect the population of women who had a live birth that year.**

## Select Key PRAMS Topics -- NNE

- Marijuana Use
- Alcohol
- Depression
- Tobacco Smoking
- Postpartum contraception

## Phase 8 standard Qx drug use questions

### PRAMS Phase 8 Standard Drug Questions by State, Since 2016

Maine	New Hampshire	Vermont
<p><b>Marijuana use before, during, after pregnancy</b></p> <p><b>During Month Before Pregnancy:</b></p> <ul style="list-style-type: none"> <li>• OTC pain medication</li> <li>• Prescription pain meds</li> <li>• Marijuana</li> <li>• Amphetamines</li> <li>• Cocaine</li> <li>• Tranquilizers</li> <li>• Hallucinogens</li> <li>• Sniffing</li> </ul>	<p><b>Marijuana use before, during, after pregnancy</b></p> <p><b>Reasons for using marijuana</b></p>	<p><b>Marijuana use before, during, after pregnancy</b></p> <p><b>During Month Before Pregnancy Or During Most Recent Pregnancy</b></p> <ul style="list-style-type: none"> <li>• OTC pain medication</li> <li>• Prescription pain meds</li> <li>• Adderall, Ritalin, another stimulant</li> <li>• Marijuana or synthetic marijuana</li> <li>• Heroine</li> <li>• Amphetamines</li> <li>• Cocaine</li> </ul>

## Phase 8 standard Qx drug use questions
