

Nurse staffing is measured by nursing care hours per patient day (the number of nursing care hours relative to the patient workload). This measure was developed by the American Nurses Association for the National Database of Nursing Quality Indicators.

There is no national standard for optimal nurse staffing level. This is due to varying factors like intensity of patient's needs, the number of admissions, discharges and transfers during a shift, level of experience of nursing staff, layout of the unit and availability of resources (ancillary staff, technology etc.).

Intensive Care Unit

The Intensive Care Unit has 12 licensed beds. Types of services provided in this setting include care of people with, or at risk of developing life-threatening problems.

Nursing Care Hours per Patient Day (NCHPPD): April 2023 - March 2024

This graph shows the average number of direct nursing care hours provided per patient during a 24-hour period. Results are shown for care provided by registered nurses (RNs) and by all nursing staff (total) per month.

Percent of Total Nursing Care Hours Provided by RNs: April 2023 – March 2024

This graph shows the percentage of total nursing hours provided by RNs each month. The yearly average for this period is 76.48%.

Intensive Care Unit

Yearly Average of RN and Total Nursing Care Hours per Patient Day: 2014 - 2024

The graph below shows trend over time on the average RN and total nursing care hours per patient days.

ICU 2014 - 2024

Yearly Percent of Total Nursing Care Hours Provided by RNs: 2014 – 2024

The graph below shows the trend over time on the average percentage of nursing care that was provided by RN.

Nurse staffing is measured by nursing care hours per patient day (the number of nursing care hours relative to the patient workload). This measure was developed by the American Nurses Association for the National Database of Nursing Quality Indicators.

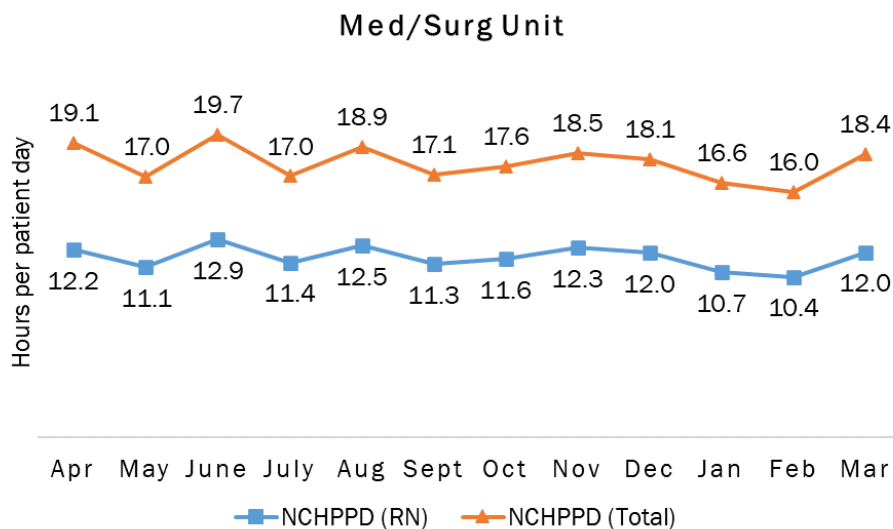

There is no national standard for optimal nurse staffing level. This is due to varying factors like intensity of patient's needs, the number of admissions, discharges and transfers during a shift, level of experience of nursing staff, layout of the unit and availability of resources (ancillary staff, technology etc.).

Medical/Surgical Unit

The Medical/Surgical Unit has 51 licensed beds and cares for patients ages 15 and older. Types of services provided in this setting include care of people with general medical and surgical problems, heart monitoring, end-of-life care, and rehabilitative care.

Nursing Care Hours per Patient Day (NCHPPD): April 2023 - March 2024

This graph shows the average number of direct nursing care hours provided per patient during a 24-hour period. Results are shown for care provided by registered nurses (RNs) and by all nursing staff (total) per month.

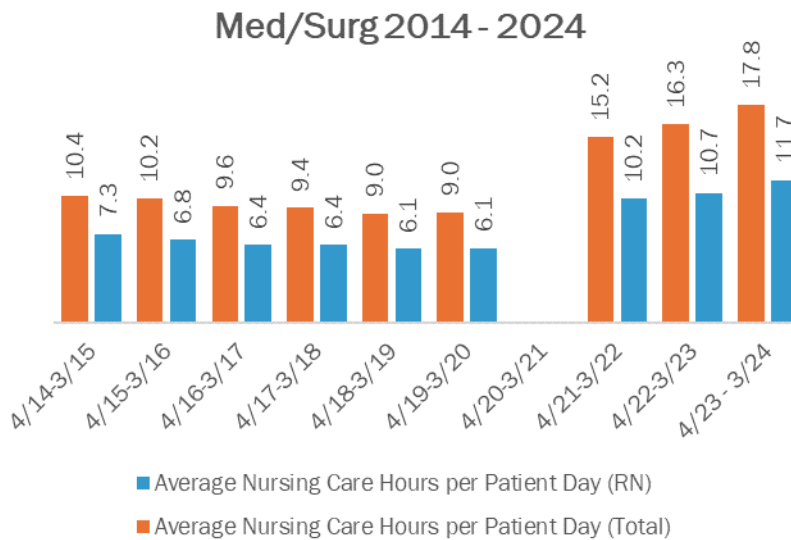

Percent of Total Nursing Care Hours Provided by RNs: April 2023 – March 2024

This graph shows the percentage of total nursing hours provided by RNs each month. The yearly average for this period is 65.68%.

Yearly Average of RN and Total Nursing Care Hours per Patient Day: 2014 - 2024

The graph below shows trend over time on the average RN and total nursing care hours per patient days.

2024 Nurse Staffing Data

Yearly Percent of Total Nursing Care Hours Provided by RNs: 2014 – 2024

The graph below shows the trend over time on the average percentage of nursing care that was provided by RN.

Nurse staffing is measured by nursing care hours per patient day (the number of nursing care hours relative to the patient workload). This measure was developed by the American Nurses Association for the National Database of Nursing Quality Indicators.

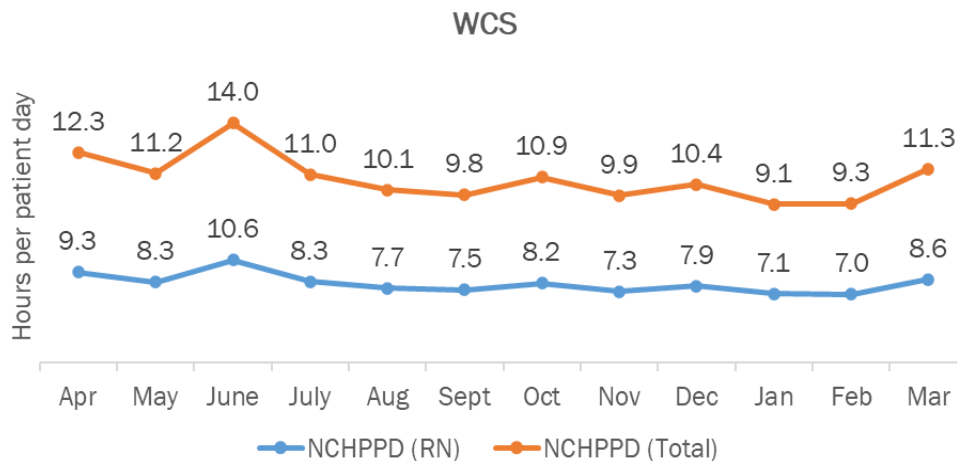

There is no national standard for optimal nurse staffing level. This is due to varying factors like intensity of patient's needs, the number of admissions, discharges and transfers during a shift, level of experience of nursing staff, layout of the unit and availability of resources (ancillary staff, technology etc.).

Women's and Children's Services

The Intensive Care Unit has 12 licensed beds. Types of services provided in this setting include care of people with, or at risk of developing life-threatening problems.

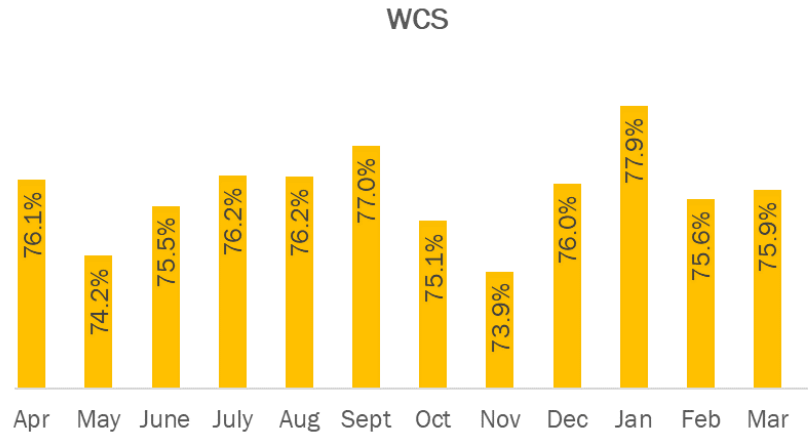

Nursing Care Hours per Patient Day (NCHPPD): April 2023 - March 2024

This graph shows the average number of direct nursing care hours provided per patient during a 24-hour period. Results are shown for care provided by registered nurses (RNs) and by all nursing staff (total) per month.

Percent of Total Nursing Care Hours Provided by RNs: April 2023 – March 2024

This graph shows the percentage of total nursing hours provided by RNs each month. The yearly average for this period is 75.8%.

Yearly Average of RN and Total Nursing Care Hours per Patient Day: 2014 - 2024

The yearly average of RN and Total Nursing Care Hours per Patient Day is not available for 2024.

Yearly Percent of Total Nursing Care Hours Provided by RNs: 2014 – 2024

The yearly average Percent of Total Nursing Care Hours Provided by RNs is not available for 2024.
