#### 2023 HOSPITAL REPORT CARD

#### **About Patient's Perspective of Care Survey Measure**

#### <u>Hospital Consumer Assessment of Healthcare Providers and Systems</u> (HCAHPS)

#### Overview:

The HCAHPS (Hospital Consumer Assessment of Healthcare Providers and Systems) survey is the first national, standardized, publicly reported survey of patients' perspectives of hospital care. HCAHPS (pronounced "H-caps"), also known as the CAHPS Hospital Survey, is a survey instrument and data collection methodology for measuring patients' perceptions of their hospital experience. While many hospitals have collected information on patient satisfaction for their own internal use, until HCAHPS there was no national standard for collecting and publicly reporting information about patient experience of care that allowed valid comparisons to be made across hospitals locally, regionally and nationally.

#### About star ratings:

CMS employs all survey responses in the construction of the HCAHPS star ratings. To receive star ratings, hospitals must have at least 100 completed surveys in a given four-quarter period. Then the responses to the survey items used in each measure are scored linearly, adjusted, rescaled, averaged across quarters, and rounded to produce a 0-100 linear-scaled score. Next, the linear scores are converted into the star ratings for the 10 HCAHPS measures. The star ratings for each of 10 HCAHPS measures are determined by applying a clustering algorithm to the individual measure scores. For detailed information, visit the website: <a href="http://www.hcahpsonline.org/en/hcahps-star-ratings/">http://www.hcahpsonline.org/en/hcahps-star-ratings/</a>

To construct the HCAHPS summary star ratings, CMS collects the following components: 1. The star ratings from each of the 6 HCAHPS composite measures. 2. A single star rating for the HCAHPS individual items. 3. A single star rating for the HCAHPS global items. The 8 star ratings (6 composite measure star ratings + star rating for individual items + star rating for global items) are combined as a simple average to form the HCAHPS summary star rating.
