

Yellow Dot Program

Critical information when it counts!

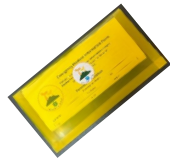

Assist first responders in quickly accessing important information, helping to provide effective medical care during an emergency, on the road or at home.

How does it work?

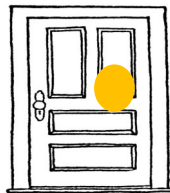

Complete the forms: Each person will complete 2 copies of the forms. If applicable, make 2 copies of any DNR/AD and include a recent picture to help identify you. Fold and put each set of forms in the yellow envelopes.

Place the completed kits: Put 1 envelope (with completed forms) in the car glovebox and 1 envelope on the refrigerator door in your home or a where it can be seen.

Place the decals! Put 1 Yellow Dot on the drivers rear side window of your car. Place the second Yellow Dot on an entry door of your home. This helps first responders look for the kit if you call 911.
