## Acknowledgments

The production of this document would not be possible without the assistance of many individuals and the cooperation of the hospitals.

The Vermont Department of Banking, Insurance, Securities and Health Care Administration (BISHCA) thanks the Vermont Association of Hospitals and Health Systems - Network Services Organization (VAHHS-NSO) for providing assistance under a contract with the department and for working with the hospitals to ensure timely and accurate reporting of the data. BISHCA also thanks the participating hospitals for their efforts in submitting the data and responding to requests for clarification and corrections. In addition, BISHCA appreciates the sharing of data by the New Hampshire Department of Health and Human Services, the Massachusetts Division of Health Care Finance and Policy and the New York Department of Health. These organizations provide data for Vermont residents using New Hampshire, Massachusetts and New York hospitals.

## Disclaimer

Hospital discharge data for use in this publication were supplied by the VAHHS-NSO reporting system, Vermont Explor, under a contract with BISHCA. These data were supplied upon the authorization of the hospitals through agreements between VAHHS-NSO and each participating hospital.

After receipt of the data files from VAHHS-NSO, the data undergo additional editing and processing by the Vermont Department of Health (VDH), under an agreement with BISHCA, before inclusion in the Vermont Uniform Hospital Discharge Data Set. The Vermont Uniform Hospital Discharge Data Set is used to construct this Hospital Utilization Report and is the official state data file available to the public. The Health Department does not assume responsibility for errors in the data due to coding or processing by hospitals, VAHHS-NSO Vermont Explor, or other data providers.

## Report Available in Electronic Format

This report is available on the BISHCA website at: <http://www.bishca.state.vt.us/> under HEALTH INSURANCE / HEALTH CARE INDUSTRY > [Data & Reports: Health Care, Health Insurance, Hospitals](#). Tables are also posted there in Excel, Word or PDF formats. To obtain an abbreviated hard copy of this report contact the Vermont Department of Health at (802) 863-7300 or (800) 869-2871.

## Requesting Hospital Data Files

Public use hospital discharge data files are available for download on the BISHCA website at: <http://www.bishca.state.vt.us/> under HEALTH INSURANCE / HEALTH CARE INDUSTRY > [Data & Reports: Health Care, Health Insurance, Hospitals](#). Information on requesting research hospital discharge data sets is also provided on this website. For any additional information concerning the data sets contact the Vermont Division of Health Care Administration at (802) 828-2900 or (800) 631-7788.

# Introduction

*The Vermont Inpatient Hospital Utilization Report* provides information about patient health issues and hospital services provided within the inpatient setting.

Under the provisions of Act 53 addressing hospital and health system accountability and spending, these data provide key information about population-based utilization of inpatient services for the hospital community needs assessments (CNA) and the four-year health resource allocation plan (HRAP). The HRAP identifies and prioritizes statewide and sub-state need for health services and resources and informs the certificate of need (CON) process.

Data are presented in two basic ways:

- Hospital-based analyses compare data by hospital and include all patients who received services from that hospital, regardless of their residency. Hospital-based analyses have applications for health system planning, cost containment, and resource development.
- For inpatient data, hospital service area (HSA) analyses are used to compare data for residents of 13 geographic regions of Vermont who were provided services in any Vermont, New Hampshire, New York, or Massachusetts hospital. With some caveats, HSA analyses can help compare morbidity and practice variations across different regions of Vermont. See page 7 for maps of Vermont towns and HSAs.

This volume includes data across inpatient setting for all patients, regardless of residency, at Vermont's acute care hospitals. It also includes data for Vermont residents using New Hampshire, New York and and Massachusetts acute care hospitals.

## History of the Hospital Utilization Report

The nine sections that comprise this volume are a continuation of a series of hospital utilization publications that have been issued annually since 1975. Although publication of *The Vermont Hospital Monograph Series* has been continuous, different organizations have been involved in its production over the years. The Cooperative Health Information Center of Vermont, Inc. (CHICV) published the Monographs from 1975 to 1982. In 1983, the CHICV corporation was dissolved and statutory authority to collect, process, store and analyze hospital utilization information was given to the Vermont Hospital Data Council. The Council designated the Vermont Department of Health (VDH) as manager of the hospital utilization data. In 1992, the Data Council's statutory authority was transferred to the Vermont Health Care Authority. In 1996, the Authority was merged with the Department of Banking, Insurance and Securities and became the Division of Health Care Administration. Under 18 V.S.A. §§ 9410, 9453, and 9457, the Division is charged with collecting hospital utilization data in a standardized format and to ensure that these data are not used to directly or indirectly identify individual patients or health care practitioners. The Vermont Department of Banking, Insurance, Securities and Division of Health Care Administration (BISHCA) have an agreement with VDH to manage the hospital discharge database and produce the utilization reports. The utilization reports have been published by VDH since 1983.

Beginning in 1998, a section on outpatient procedures (ambulatory surgeries) was included. Emergency Department (ED) and Hospital Setting Comparison sections were added in 2001. Prior to 1998, outpatient procedures were reported in a separate publication.

Beginning in 2006 the hospital utilization reports are now published in three separate volumes, Inpatient Discharges, Outpatient

Discharges and Emergency Visits. This report is the first in the series now titled the “Vermont Inpatient Hospital Utilization Report”.

## Sources of Data

All fourteen of Vermont's civilian acute care hospitals and the Veterans Administration hospital in White River Junction have contributed data to the Vermont Uniform Hospital Discharge Data Set. The Brattleboro Retreat in Brattleboro and the Vermont State Hospital in Waterbury are strictly psychiatric hospitals and have not participated in this data collection effort. The acute care hospitals, under an agreement with the Vermont Association of Hospitals and Health Systems - Network Services Organization (VAHHS-NSO), supply discharge abstracts to the Missouri Hospital Association's Hospital Industry Data Institute, the VAHHS-NSO contractor. Under a contract with BISHCA, VAHHS-NSO provides data to VDH. Under agreements administered by BISHCA, VDH obtains records of Vermont resident discharges from hospitals in neighboring states from the Massachusetts Division of Health Care Finance and Policy, the New Hampshire Department of Health and Human Services and the New York Department of Health.

Upon receipt of Vermont hospital discharge data from VAHHS-NSO, VDH edits the data and checks for completeness and internal consistency. Results of these analyses are shared with VAHHS and participating Vermont hospitals as part of an ongoing quality improvement process.

## Diagnosis and Procedure Grouping Systems

### *DRGs and MDCs*

For inpatient discharges, Diagnosis Related Groups (DRGs) and Major Diagnostic Categories (MDCs) are used for grouping diagnoses.

In October 1983, the U.S. Centers for Medicare and Medicaid (CMS) adopted a prospective system for reimbursing hospitals for hospitalizations of Medicare beneficiaries. This system established a payment schedule for groups of similar conditions that were expected to

consume similar resources. Since 1983, the DRGs have been refined and added to a number of times, and are currently revised annually on October 1. The DRG assigned to an individual hospitalization is the definition in effect on the date of discharge.

DRGs, which describe conditions and procedures related to similar body systems or etiologies, are grouped into 25 MDCs. MDCs are the basic tabulation units used in the inpatient report. Inpatient discharges with an invalid MDC, (3 in 2006), are excluded from this report. MDCs are listed in Appendix B. Appendix C lists DRGs within each MDC.

## Exclusions

As in any dataset of this size, there are a small number of records with incomplete or missing elements. These records must be excluded from particular analyses. We have indicated the number of missing records in each table so that all totals can be reconciled. Veteran Administration data was not provided for discharge periods from 7/1/2006 to 12/31/2006 so VA data reported represents the first 6 months of this data year.

Throughout the report, to avoid counting hospitalizations for delivery twice, the maternal record is included, but the infant record is not. This is a standard practice in hospital utilization analysis. However, discharge records for infants are retained in the Vermont Uniform Hospital Discharge Data Set to support research and analyses that include this population.

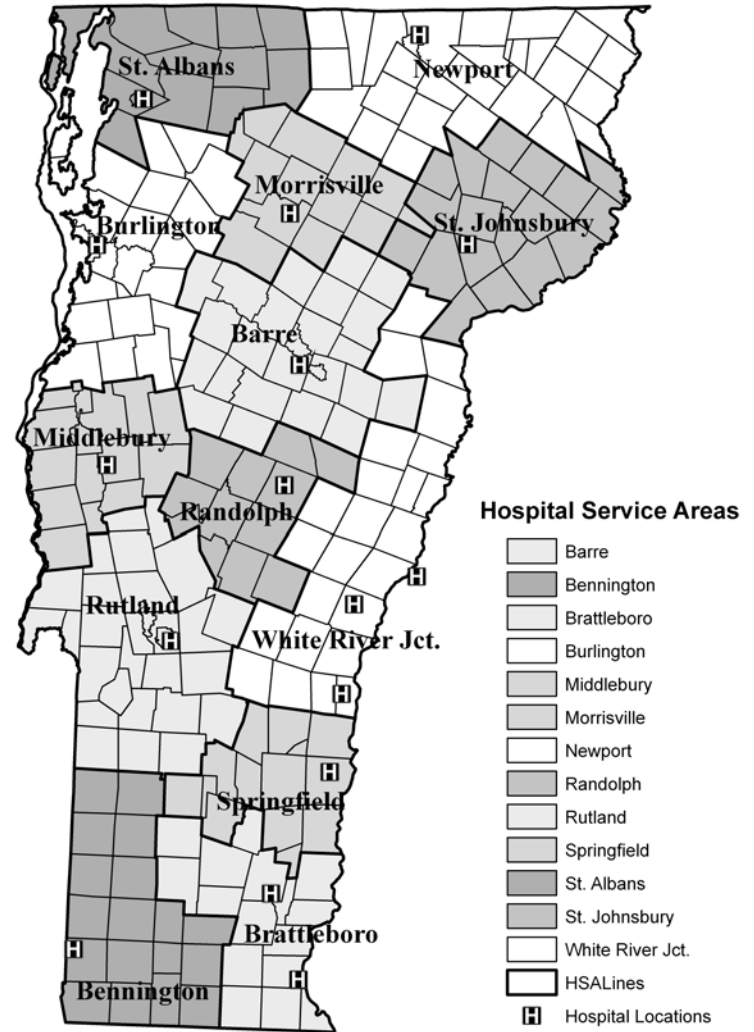

## Additional Analyses

BISHCA and VDH collaborate to publish an abbreviated version of this report that includes highlights and additional analyses of Vermont hospital data. To obtain copies, contact the Vermont Division of Health Care Administration at (802) 828-2900 or (800) 631-7788, or check the division's website ([www.bishca.state.vt.us](http://www.bishca.state.vt.us), then select "Health Care Administration").

## Vermont Towns

## Vermont Hospital Service Areas and Hospitals

---

## Overview

---

- **Health care spending** increased 8.5 percent in Vermont from 2005 to 2006, totaling approximately \$3.9 billion in expenditures. Nationally, health care expenditures increased 6.7 percent in 2006. Health care spending accounted for about 16.3 percent of Vermont's Gross State Product (GSP) in 2006. A third (\$1.3 billion) of the total health spending for Vermont residents was for hospital-based services in 2006.
- **Vermont's Population is Aging:** From 1990-2006, the percent of Vermonters aged 45+ continued to grow. This was due, in part, to the aging of the post World War II Baby Boom generation born between 1946 and 1964. In 1990, none of the Baby Boomers had reached age 45. By 2006, more than half were in their upper 40's and 50's. As the Baby Boomers continue to age, the number of older adults with age-related medical problems and chronic diseases will continue to rise accordingly and require more health care services.
- **Total hospital revenues continue to rise,** outpatient revenues continue to outpace inpatient revenues. Between 1997 and 2006, inpatient revenues increased 74%. (See Figure 1). As published in the *2006 Vermont Inpatient Hospital Utilization Report*, the average charge for an inpatient hospitalization in Vermont was \$15,456 compared to \$14,353 in 2005.

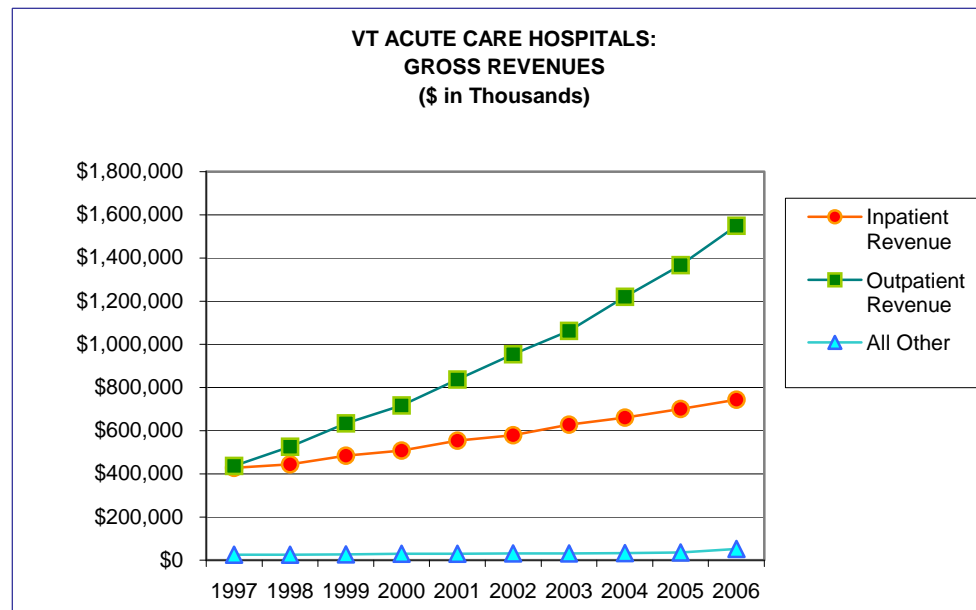

Figure 1

Data Source: 2006 HCA Annual Budget Submission.

---

## Inpatient Highlights

---

### Highlights of Vermont Inpatient Utilization

- **In 2006 there were 48,077 inpatient discharges** from Vermont hospitals (excluding the VA hospital and newborn records. These discharges include maternal records for newborn deliveries), and represent Vermont residents and non-residents. There were 1,390 inpatient discharges from VA hospital for the first six months of 2006. Of the total inpatient discharges, almost half originated in the Emergency Department (22,591).
- **Of the 48,077 inpatient discharges from Vermont hospitals**, 41,100 of those were Vermont residents, while the remaining 6,977 were non-residents.
- **The bordering states of New Hampshire, New York and Massachusetts reported** 10,705 Vermont resident discharges for inpatient services occurring at out-of-state hospitals. Most of the Vermont residents (7,145 discharges) were from Dartmouth Hitchcock Medical Center in NH; another 1,801 Vermont resident discharges were from other NH hospitals. There were 1,026 Vermont resident discharges from Massachusetts hospitals and 733 from New York area hospitals.
- **Inpatient utilization continues to decline.** Despite the aging of Vermont's population, the inpatient hospital discharge rate and average length of stay decreased significantly between 1990 and 2006 (See Figures 2 & 4). Factors influencing this decline include the continuing shift of treatment and procedures from the inpatient to the outpatient setting and changes in reimbursement and cost-containment strategies.
- **Variation in utilization rates** between hospital service areas from 2002-2006 are illustrated in figure 3. In 2006, the Morrisville hospital service area had the lowest age adjusted utilization rate, 74.6 discharges per 1,000 Vermonters. The Bennington and Springfield hospital service areas had the highest utilization rate, 106.8 discharges per 1,000 Vermonters.
- **Out-migration of Vermont resident inpatient discharges continues to outpace in-migration of non-resident discharges.** Out-migration of Vermont resident discharges to out-of-state hospitals in New Hampshire, New York and Massachusetts totaled 10,777 in 2006 while in-migration of non-resident discharges into Vermont hospitals totaled 7,077.

For more information on in-migration and out-migration of Vermont and out-state-residents for inpatient hospital services please see the “**Vermont Hospital Migration Reports**” which can be found at: [http://www.bishca.state.vt.us/HcaDiv/Data\\_Reports/a\\_data\\_reports\\_index.htm](http://www.bishca.state.vt.us/HcaDiv/Data_Reports/a_data_reports_index.htm)

---

## Inpatient Highlights

---

### Trends in Utilization: Discharge Rates

The age-adjusted discharge rate measures how often hospital care is provided on a population basis adjusting for differences in age.

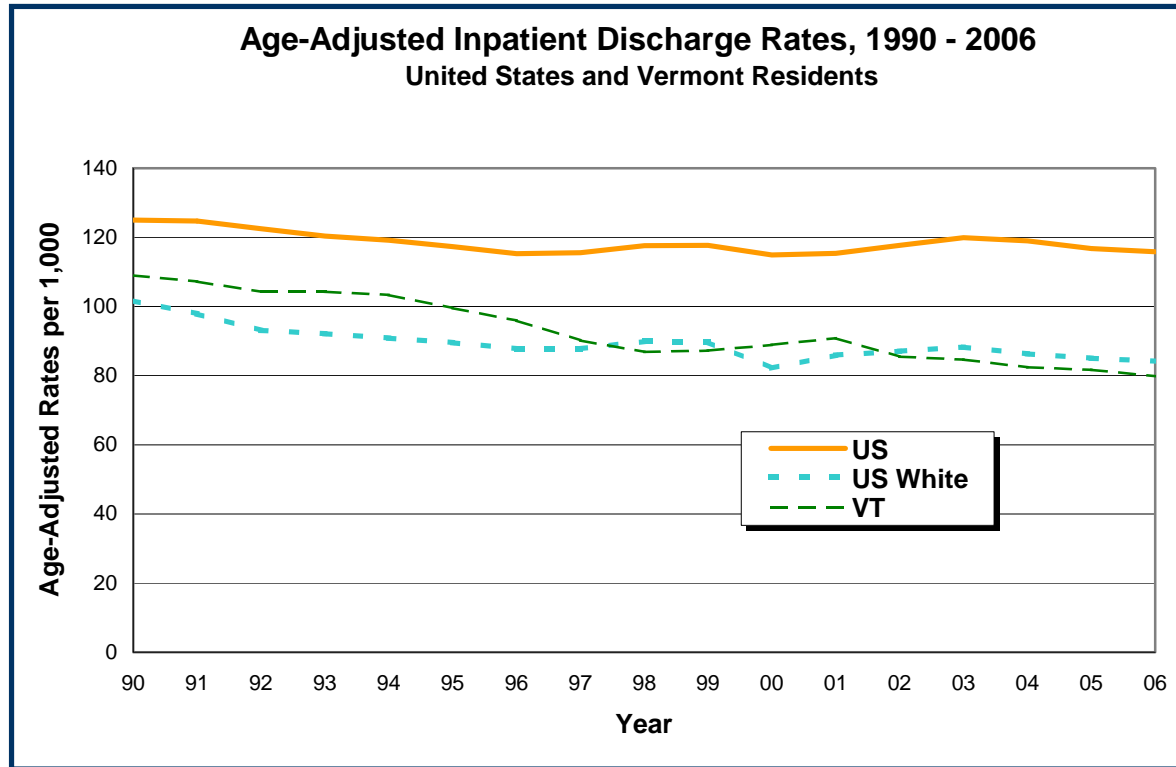

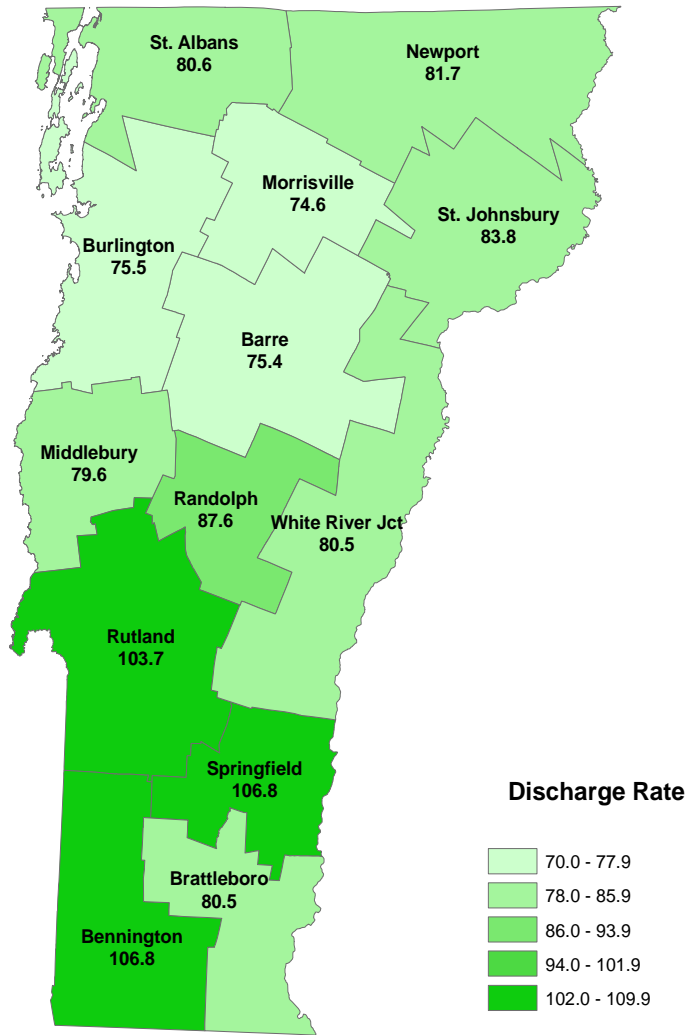

Figure 2

- **The age-adjusted Vermont inpatient discharge rate continues to decline.** Vermont’s inpatient hospitalization rate decreased significantly (-26.7 %) from 1990-2006. In 2006, the Vermont rate reached a new low. The downward trend is due in part to the shift of treatment and procedures to the outpatient setting.
- **The Vermont inpatient discharge rates are lower than overall U.S. rates.** Vermont’s discharge rate was significantly lower than the overall U.S. rate every year from 1990-2006, and slightly lower than the U.S. “white” rate from 2002-2006. Since Vermont’s population is less racially diverse than the overall national profile, the U.S. “white” rates are more comparable.

Data Source: VT Uniform Hospital Discharge Data Set  
While records for newborn discharges are excluded, maternal records for deliveries are included.

### 2006 Age Adjusted Discharge Rate/1000 Population by Hospital Service Area

**Figure 3**  
Data Source: VT Uniform Hospital Discharge Data Set  
Age adjusted to the State Population

---

## Inpatient Highlights

---

### Trends in Utilization: Average Length of Stay

The age-adjusted average length of stay is an approximate measure of the resources used per discharge, adjusting for differences in age.

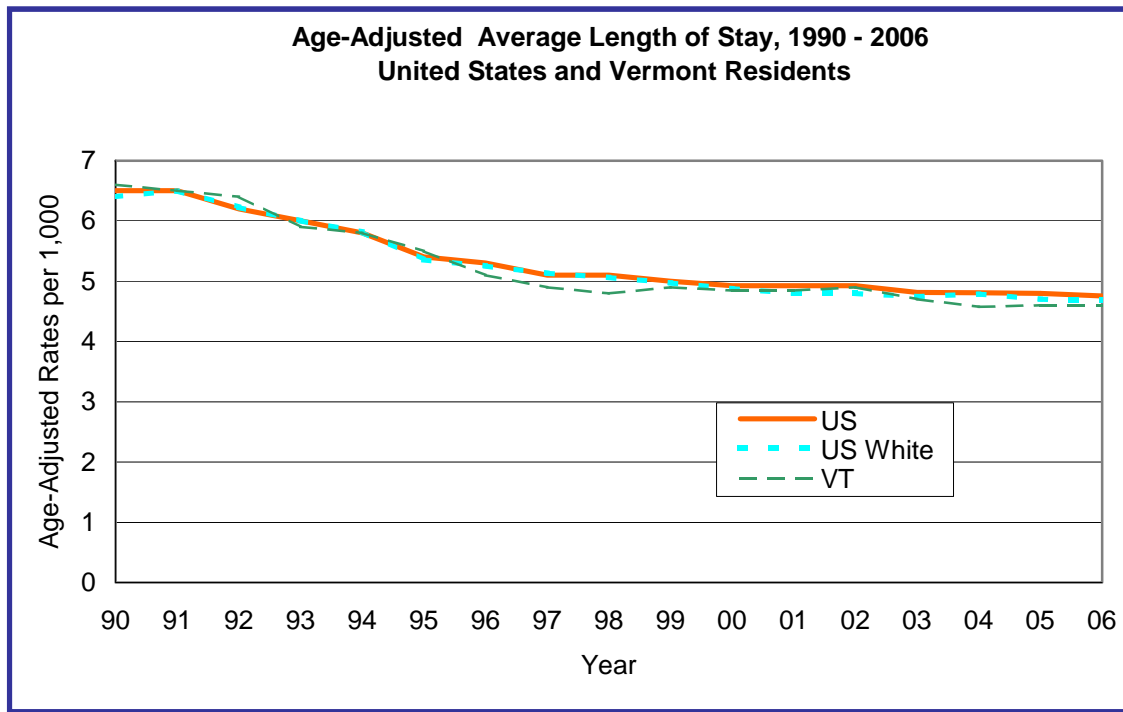

Figure 4

- **Vermont’s age-adjusted average length of stay continues to decline.** Vermont’s average length of stay dropped significantly (-30.3%) from 1990-2006, due, in part, to the shift from inpatient to outpatient and community based settings for health care services and changes in reimbursement and cost containment strategies. Similar drops occurred for the overall U.S. Rate (-26.8%) and the U.S. “White” rate (-26.9%).

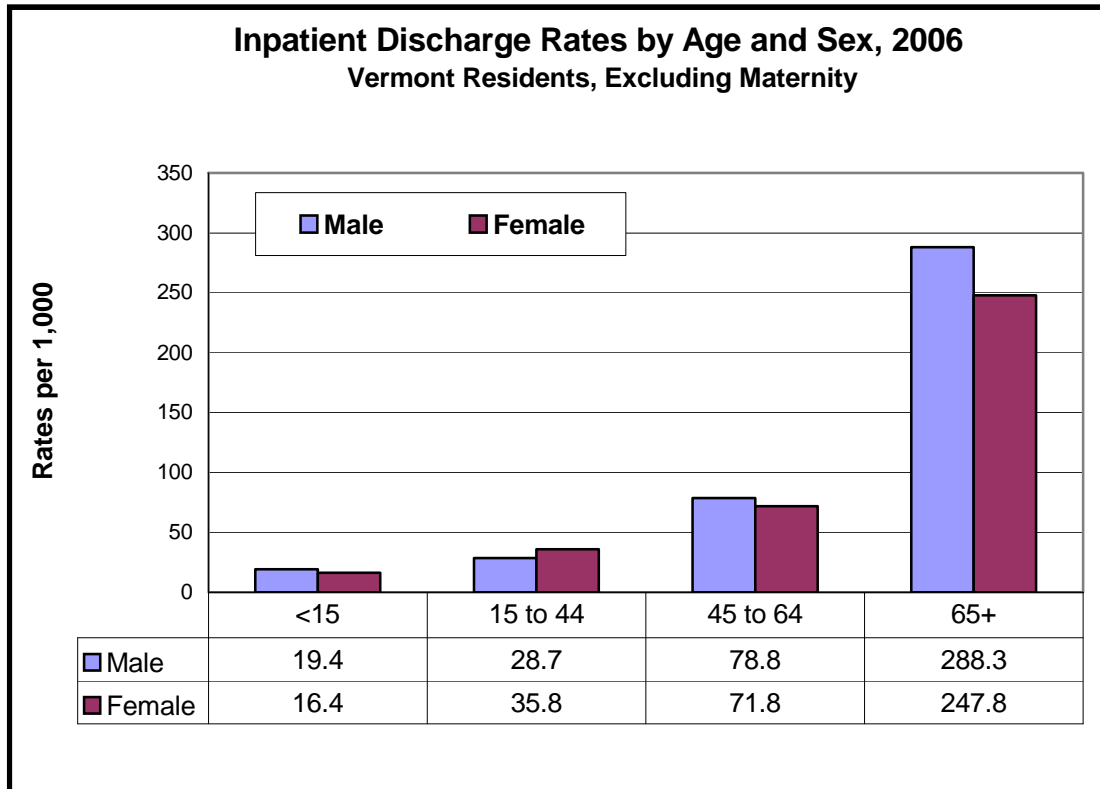

Data Source: VT Uniform Hospital Discharge Data Set  
While records for newborn discharges are excluded, maternal records for deliveries are included.

---

## Inpatient Highlights

---

### Patient Characteristics: Variations by Age and Sex

- **Excluding hospitalizations for pregnancy and childbirth**, the hospitalization rate for females is lower than the male rate in all age groups except ages 15-44.

**Figure 5**

Data Source: VT Uniform Hospital Discharge Data Set  
While records for newborn discharges are excluded, maternal records for deliveries are included.

---

## Inpatient Highlights

---

### Reason for Hospitalization: Top Five MDCs for Discharges

MDCs (Major Diagnostic Categories) are 25 categories of related diagnoses that collapse 540 more detailed groupings called Diagnosis Related Groups (DRGs).

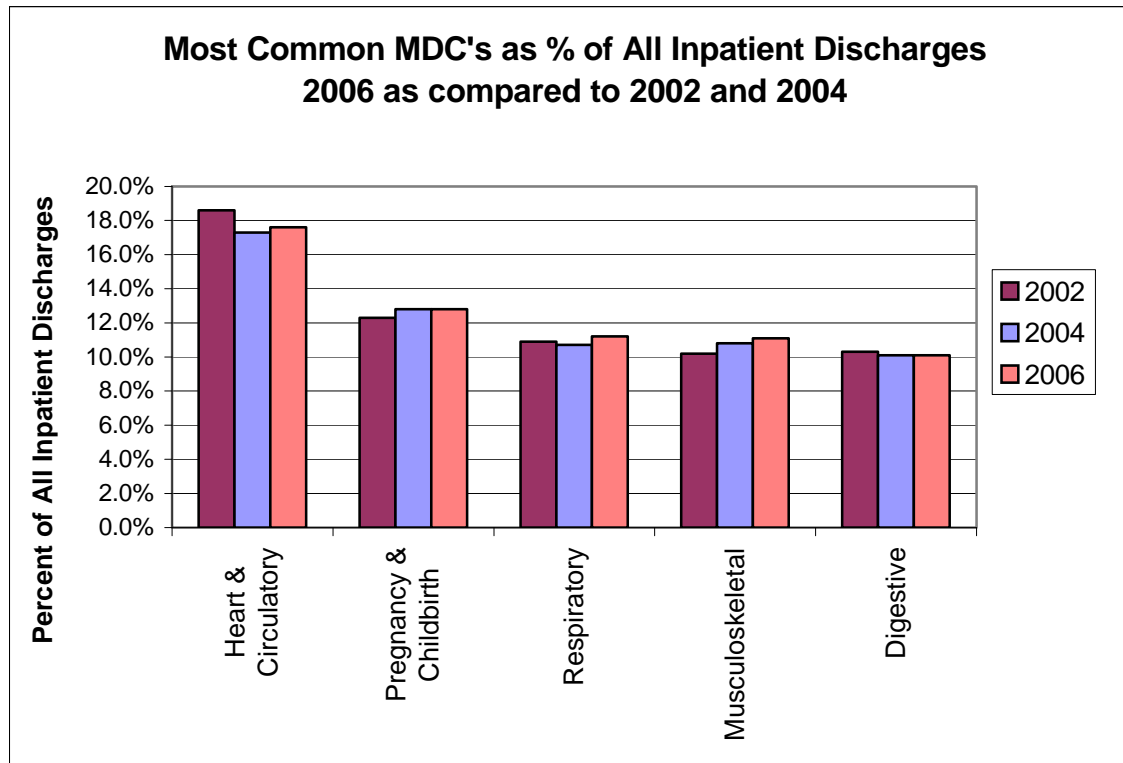

Figure 6

Data Source: VT Uniform Hospital Discharge Data Set  
While records for newborn discharges are excluded, maternal records for deliveries are included.

- **These five MDCs** account for approximately 63% of all hospitalizations.
- **Among these five MDCs, the most dramatic change since 2000** was the continual decline in Heart & Circulatory with a slight rise in 2006. Pregnancy and childbirth have leveled off since 2004. There has been a continuous increase in Musculoskeletal hospitalizations since 2002.
- **Continuing increase in Musculoskeletal hospitalizations since 2002.** The age-adjusted discharge rates per 1,000 for the musculoskeletal MDC by hospital service area ranged from 7.8 per 1,000 (Newport) to 12.1 per 1,000 (Rutland) in 2006.

# User's Guide to Inpatient Tables

## Inpatient Data Collection in Vermont

Inpatient discharge data have been the core of the Vermont hospital utilization reports since 1975. These data have been helpful in hospital planning and have provided a longitudinal view of hospital utilization and the health of Vermonters.

## Units of Measure

The inpatient sections use three measures of hospital utilization:

A *discharge* is an individual inpatient hospitalization. Discharge dates, not admission dates, are used to indicate when a case is reported. A count of discharges measures how often care is sought. The same individual will be counted as more than one discharge if hospitalized more than once during the time studied.

A *patient day* is defined as a stay in a hospital for all or part of a day. Patient days are one way of measuring the amount of care provided.

The *average length of stay* is the total patient days divided by the number of discharges in a selected category. It is a rough measure of the amount of care provided during a typical hospital stay.

## Hospital Service Area Analyses

The majority of the nine inpatient Sections compare data on residents of hospital service areas (HSAs). Each HSA is defined by the geographically distinct population of Vermonters who are highly dependent on a hospital or group of hospitals. Each inpatient record is assigned to an HSA. This permits comparison of hospital utilization

patterns for residents of the various HSAs, regardless of where they are hospitalized.

Statistics for HSA analyses include population-based rates that are adjusted for differences such as age distribution in population characteristics from one HSA to another. Using population-based rates, especially age-adjusted rates, differences in hospitalization patterns for residents of different regions of the state can be identified. See pages 10-13 for two detailed examples.

HSAs are less relevant for certain services that have historically been regionalized such as acute inpatient mental health services for persons with severe mental illness. In 2006, four out of the fourteen Vermont community hospitals had dedicated inpatient psychiatric units in addition to Retreat Healthcare and the Vermont State Hospital.

Hospitals take interest in HSAs because residents of their HSAs are usually their principal Vermont consumers. Analysis of anomalies and trends within its service area can aid a hospital in identifying practice variations and in strategic planning. Finally, the size and shape of an HSA can be indicative of a hospital's market penetration and the environment in which it operates.

Vermont hospitals near Vermont's borders may provide care to people in neighboring, non-Vermont towns. However, out-of-state residents are excluded from the population-based HSA comparisons. In order to include out-of-state residents in a hospital service area, information would need to be collected on all hospitalizations of the residents in those areas, including use of non-Vermont hospitals. In contrast to the HSA comparisons, out-of-state residents using Vermont hospitals are included in the hospital-based comparisons.

While hospitals may provide the majority of care within their service area, a substantial quantity of the care received by the population may also come from other hospitals. If the hospital is a regional referral center, the hospital may be providing the majority of care to residents within its service area while also providing specialty care to residents from other service areas.

#### ***Fourth Version of Hospital Service Areas***

Due to changes in technology, financing and reimbursement, population characteristics, and the economy, the health care system serving Vermonters constantly changes. The hospital service area (HSA) definitions used in the Reports have been modified three times to reflect changing discharge patterns.

Starting with the 2002 Report, HSAs are based on inpatient discharges, where the diagnosis indicated the need for immediate care, for the years 1997-2001. Prior definitions of HSAs have been based on all inpatient stays (except for newborns) and have used a strict decision rule for inclusion of ZipTowns which are towns or groups of towns (see definition below for ZipTowns) in a hospital's service area. Use of a strict inclusion rule meant that there were always towns that were not assigned to any HSA and were labeled "contested."

In preparing for this fourth version of HSAs, rules used to define the 3<sup>rd</sup> version of HSAs were applied to 1997-2001 data. The number of contested towns rose from 54 to 80, nearly a third of all Vermont towns. This resulted in the loss of one hospital service area and a serious erosion of others. As a result of this increase in contested towns, two major changes were made to the process of defining HSAs. In addition to these definitional changes, HSA names were changed. To distinguish these new HSAs from previous ones, HSAs were given the name of the most populous town in their area.

The first major change was that selection of records was limited to those discharges with diagnoses considered to require immediate

hospitalization as described by Newton and Goldacre in their 1994 article, "How many patients are admitted in districts other than their own, and why?" (Journal of Public Health Medicine, 1994, Vol. 16, No. 2, pp. 159-164). Newton and Goldacre used records of patients with acute conditions that require immediate hospitalization, because patients with these conditions tend to go to the hospital nearest to them when they become ill. The authors excluded newborns and patients transferred from another hospital. The authors included records with the following acute conditions as their primary diagnoses:

appendicitis (ICD-9-CM codes 530-543),  
abscess of anal and rectal regions (ICD-9-CM codes 566),  
peritonitis (ICD-9-CM codes 567),  
acute myocardial infarction (ICD-9-CM codes 410),  
pneumococcal pneumonia (ICD-9-CM codes 481), and  
asthma (ICD-9-CM codes 493).

The second major change was the shift to a plurality rule in assigning ZipTowns to HSAs, so that all towns are assigned to an HSA with none remaining contested. ZipTowns are towns or groups of towns with over 1,000 residents and relatively contained ZIP code boundaries (see Appendix E for a list of ZipTowns in each HSA). ZipTowns were assigned to hospital service areas as follows:

- 1) If the plurality of a ZipTown's discharges were from a Vermont hospital or Dartmouth Hitchcock Medical Center (DHMC) in Lebanon, New Hampshire, the ZipTown was assigned to that hospital's service area.
- 2) If the plurality of a ZipTown's discharges were from a non-Vermont hospital other than DHMC, the ZipTown was assigned to the HSA of the Vermont hospital (or DHMC) with the next highest number of discharges.

One ZipTown called Guildhall, made up of five towns in Essex County which were previously designated as contested, had only four discharges to a nearby Vermont hospital. All four discharges were

Lunenburg residents discharged from Northeastern Vermont Regional Hospital in St. Johnsbury. Using the plurality rule, Lunenburg was added to the Burke area ZipTown which is assigned to the St. Johnsbury HSA. The remaining four towns in the Guildhall ZipTown had no discharges to a nearby Vermont hospital. These four towns were assigned to HSAs based on a decision to follow the boundaries used for the Health Department’s Community Public Health District Offices. Using this approach, Guildhall and Maidstone were also assigned to the Burke area ZipTown in the St. Johnsbury HSA. The remaining towns of Bloomfield and Brunswick were assigned to the Canaan area ZipTown in the Newport HSA.

The HSAs continue to include two multi-hospital areas: the White River Junction HSA (Dartmouth Hitchcock Medical Center, Mt. Ascutney Hospital, and the Veterans Administration Hospital) and the Brattleboro HSA (Brattleboro Memorial Hospital and Grace Cottage Hospital). These HSAs include multiple hospitals because resident hospitalizations are split among the hospitals with no clear majority of inpatient discharges concentrated at any one hospital.

Color maps of HSAs and a complete description of the process used to define the current service areas are found in the *2002 Vermont Hospital Monograph Companion*. Black and white maps of Vermont towns and HSAs are also shown on page 7 of the Introduction to this report.

### ***Hospital Service Area Analyses Using Population-Based Rates***

The rates reported in this volume combine information about hospitalizations and information about populations “at risk” of being hospitalized. Rates enable the comparison of areas that differ in population and HSAs are the population areas used in these comparisons.

Simple or “crude” rates are typically expressed as the number of events per some large number of people, such as 1,000. This rate is

called *crude* because it only compensates for relative population size. *Adjusted* rates incorporate additional variables, such as age, into the calculation.

For example, the “crude” discharge rate for residents of an HSA would be calculated by multiplying 1,000 times the following:

hospitalizations of HSA residents in any VT, MA, NH, or NY hospital  
population of the HSA

To compare hospitalizations for Heart and Circulatory Diseases (MDC 5) in two HSAs, Burlington and Rutland, the number of hospitalizations (the numerator for the rate) would need to be established:<sup>1</sup>

#### ***Discharges for Heart and Circulatory Diseases, 2006***

Burlington HSA	1,861
Rutland HSA	1,204

Although more residents of the Burlington HSA are hospitalized for these conditions, it is not possible to answer the question of whether heart and circulatory diseases are a more significant problem for residents of the Burlington HSA. In order to answer this question, the number of people living in these two HSAs (the denominator for the rate) is needed.<sup>2</sup>

#### ***Population Estimates, 2006***

Burlington HSA	169,401
Rutland HSA	64,466

---

<sup>1</sup>Number of discharges by HSA and MDC are found in Sections V & VI

<sup>2</sup>Population numbers are found in Section I.

The Burlington HSA has more than twice the population of the Rutland HSA. Given the greater population in the Burlington HSA, more discharges would be expected, even if all other variables (such as health status and the practice style of area physicians) were equal.

In order to remove the effect of the different population size, the rate is used instead of the count. The crude rates for the Burlington and Rutland HSAs provide a different picture from the counts:<sup>3</sup>

***Crude Discharge Rates per 1,000 HSA Residents, 2006  
Heart and Circulatory Diseases***

Burlington HSA	11.0
Rutland HSA	18.7

Although the Burlington HSA had more Heart and Circulatory discharges, the discharge rate of the Burlington HSA is much lower than that of Rutland's. That is, a resident of the Rutland HSA is more than one and a half times more likely to be hospitalized for heart disease as a resident of the Burlington HSA.

These crude rates are valuable for comparing rates over limited time periods or among similar populations. However, the utility of crude rates is limited because of the link between health status and age. In general, older people use more hospital resources than do younger people.

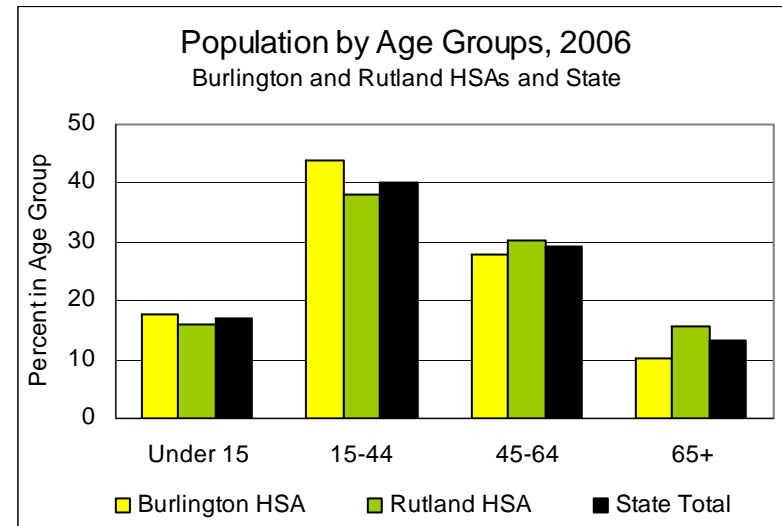

To make comparisons among health care systems, the effect of different age distributions needs to be removed from these comparisons. In the example above, if the average age in Burlington was 30 and the average age in Rutland was 55, the difference in rates would not be surprising. However, if the average ages in the two service areas were

<sup>3</sup>Crude rates by HSA and MDC are found in Sections V & VI.

the same, other explanations would be considered, such as differences in health status, risk factors and/or provision of care.

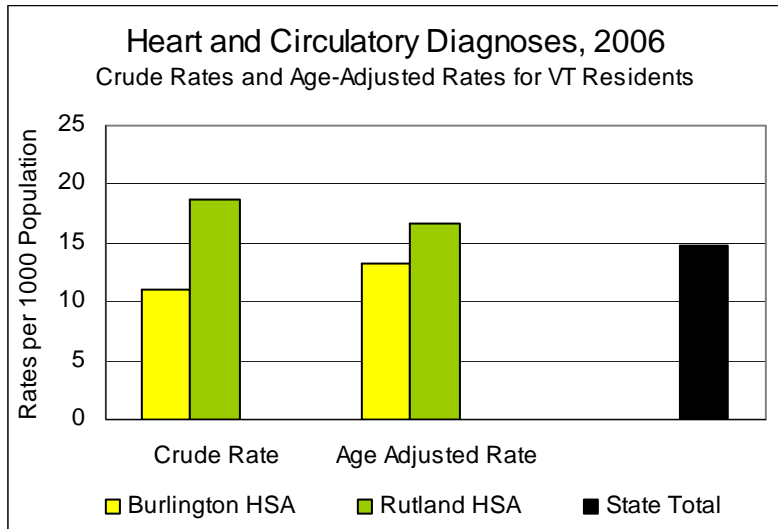

The issue can be examined by computing age-adjusted rates. Different standards, such as the projected year 2000 U.S. population, can be used for age-adjusting and different age groups can be used in the age adjustment procedure. This volume uses the overall Vermont age distribution when adjusting HSA rates. See Appendix A for a more complete description of the age-adjustment process used in this report.

To illustrate the rationale for age adjusting, consider the 2006 population distribution of the Burlington and Rutland HSAs and the state as a whole shown below. The Burlington HSA has a younger age profile than the Rutland HSA, with a larger proportion of its population

in the 15-44 age category, and a smaller proportion aged 45 and above. Age adjusting eliminates the effect of these differing age distributions on the discharge rates.

When the age-adjusted heart and circulatory discharge rates of the two HSAs are compared, the differences seen in the crude rates become smaller. Burlington HSA's low rate of heart and circulatory discharges was due, in part, to its younger population. Rutland HSA's higher rate was due, in part, to its older population.<sup>4</sup> Remaining differences may be attributable to differences in underlying health status, risk factors and/or practice patterns.

While heart and circulatory disorders are most common among older populations, delivery and abortion occur almost entirely among women aged 15-44. For this diagnostic category, therefore, the Burlington HSA would be expected to have a higher crude rate than the Rutland HSA due to its younger population. The chart below shows that this is the case. When we take the age structure of the population into account by age-adjusting, we find that in fact the Burlington HSA rate is closer

<sup>4</sup>Age-adjusted rates are found in Section 5.

to the Rutland rate.

### Hospital-Based Analyses

Some questions require a comparison of hospitals rather than HSAs. Hospital-based analysis is useful for understanding overall hospital utilization. Hospital-based analyses include all people served by the hospital, whether they are Vermont residents or not. Sections II, III, IV, and VII provide various statistics by hospital.

Section II, for example, gives a comprehensive summary of utilization by hospital. The first page of the Section provides a one-page snapshot of all Vermont hospitals plus Dartmouth Hitchcock Medical Center, including total discharges, total patient days, and average length of stay. The remaining pages of Section II present additional detail by hospital for these measures by Major Diagnostic Category (MDC).

The example below uses data from Section II to compare hospitalizations for Heart and Circulatory diagnoses (MDC 5) at Fletcher Allen Health Care and at Rutland Regional Medical Center.

*Number of Patient Days, 2006  
Heart and Circulatory Diseases*

Fletcher Allen Health Care	18,884
Rutland Regional Medical Center	3,210

For heart and circulatory diagnoses, Fletcher Allen Health Care provided more than six times as many days of hospitalization as Rutland Regional Medical Center. This difference can be a result of seeing more patients, keeping patients in the hospital longer, or a combination of the two.

In order to determine the contribution of these two factors, the number of Heart and Circulatory patient days can be divided by the number of Heart and Circulatory discharges to produce the average length of stay for Heart and Circulatory hospitalizations.

*Average Length of Stay (Days), 2006  
Heart and Circulatory Diseases*

Fletcher Allen Health Care	4.3
Rutland Regional Medical Center	3.8

At Fletcher Allen Health Care, heart and circulatory patients stay an average of 4.3 days, slightly longer than patients at Rutland Regional Medical Center who stay an average of 3.8 days. If the difference were larger, one could reasonably ask whether the patients at Fletcher Allen Health Care are sicker or if the care is less efficient. Researchers have used a variety of tools, such as measures of severity of illness, to answer such questions. This volume does not attempt to answer questions about hospital performance or health of populations. Its purpose is to provide the data that illuminate patterns and evoke questions for further study.

## **Hospital-Based Analysis Compared with Hospital Service Area Analysis**

Various Sections report both hospital-based and HSA data. Section II provides, in addition to the hospital utilization data described above, comparisons of data for hospitals and their HSAs. For example, average length of stay for each hospital is listed next to the average length of stay statistic for its HSA.

Discharge and patient day rates per 1,000 population are provided for each hospital's HSA along with the percent of those discharges and patient days provided by that hospital. In 2006, Fletcher Allen Health Care provided the highest percentage of care to residents of its HSA, accounting for 93.4 percent of the discharges for residents in its HSA and 93.7 percent of the patient days. Rutland Regional Medical Center was second highest, as the provider of 74.5 percent of the discharges and 71.7 percent of the patient days for people who live in its service area.

Data on the extent to which hospitals provide care primarily to residents of their service area are also provided in Section II. Among HSAs with a single hospital, the 2006 data show that North Country Hospital was highest on this measure, with 95.2 percent of their discharges being people who reside in their HSA. Fletcher Allen Health Care had the lowest percent on this measure, with only 52.8 percent of their discharges being people residing in their local service area. Thus, 47.2 percent of Fletcher Allen's discharges were people from other parts of Vermont or out of state.

Section VIII presents data that is hospital service area based, but with additional detail as to which hospital residents from a given HSA were receiving care.

For example in the Barre HSA, 78% of hospitalizations for Respiratory Disease were from the Central Vermont Medical Center. However, for Heart & Circulatory Disease 37% of the discharges were from Central Vermont Medical Center, 30% were from Fletcher Allen Health Care & 27% were from Dartmouth Hitchcock Medical Center.

## **Population**

Population data used in the inpatient report are from several sources:

- 2001-2002 estimates were prepared for VDH by Claritas, Inc., and
- 2003-2006 estimates were created by VDH using adjustments to the National Center for Health Statistics population estimates.

Population data are presented in Section I by HSA. These population statistics are used as the basis for all rates presented in the remaining report.

Population estimates for 2001 were produced prior to release of the detailed 2000 Census data. There is more fluctuation than usual in the 2001 estimates, especially in the younger age groups.

All data exclude newborns. Data may not add to totals due to rounding or missing values.

All rates in this monograph are crude rates. See Section V for age-adjusted rates.

AREA DAY RATE is the number of days of hospitalization per 1000 population accumulated by the population of the HSA.

AREA DISCHARGE RATE is the number of discharges per 1000 population accumulated in the HSA.

HOSP. SHARE DAYS is the percentage of days accumulated by the HSA population that were at this hospital.

HOSP. SHARE DISCH is the percentage of discharges of residents of the HSA that were from this hospital.

HOSP. TOTAL DAYS is the total number of patient days recorded at this hospital regardless of patient origin.

HOSP. TOTAL DISCH is the total number of discharges from this hospital regardless of patient origin.

PERCENT FROM HSA is the portion of all discharges from this hospital who were residents of this HSA.

PERCENT WITH DIAG. is the portion of all discharges from this hospital in the indicated diagnostic category.

AVERAGE LENGTH OF STAY - AREA is the average number of days per discharge for all residents of this HSA, regardless of hospital.

AVERAGE LENGTH OF STAY - HOSP is the average number of days per discharge for all users of this hospital, regardless of origin.

VA data is missing for 6 months - July 1, 2006 - Dec 31, 2006.

All rates in this monograph are crude rates. See Section V for age-adjusted rates.

AREA DAY RATE is the number of days of hospitalization per 1000 population accumulated by the population of the HSA.

AREA DISCHARGE RATE is the number of discharges per 1000 population accumulated in the HSA.

HOSP. SHARE DAYS is the percentage of days accumulated by the HSA population that were at this hospital.

HOSP. SHARE DISCH is the percentage of discharges of residents of the HSA that were from this hospital.

HOSP. TOTAL DAYS is the total number of patient days recorded at this hospital regardless of patient origin.

HOSP. TOTAL DISCH is the total number of discharges from this hospital regardless of patient origin.

PERCENT FROM HSA is the portion of all discharges from this hospital who were residents of this HSA.

PERCENT WITH DIAG. is the portion of all discharges from this hospital in the indicated diagnostic category.

AVERAGE LENGTH OF STAY - AREA is the average number of days per discharge for all residents of this HSA, regardless of hospital.

AVERAGE LENGTH OF STAY - HOSP is the average number of days per discharge for all users of this hospital, regardless of origin.

\*Sex-specific population used in rate calculation.

All rates in this monograph are crude rates. See Section V for age-adjusted rates.

AREA DAY RATE is the number of days of hospitalization per 1000 population accumulated by the population of the HSA.

AREA DISCHARGE RATE is the number of discharges per 1000 population accumulated in the HSA.

HOSP. SHARE DAYS is the percentage of days accumulated by the HSA population that were at this hospital.

HOSP. SHARE DISCH is the percentage of discharges of residents of the HSA that were from this hospital.

HOSP. TOTAL DAYS is the total number of patient days recorded at this hospital regardless of patient origin.

HOSP. TOTAL DISCH is the total number of discharges from this hospital regardless of patient origin.

PERCENT FROM HSA is the portion of all discharges from this hospital who were residents of this HSA.

PERCENT WITH DIAG. is the portion of all discharges from this hospital in the indicated diagnostic category.

AVERAGE LENGTH OF STAY - AREA is the average number of days per discharge for all residents of this HSA, regardless of hospital.

AVERAGE LENGTH OF STAY - HOSP is the average number of days per discharge for all users of this hospital, regardless of origin.

\*Sex-specific population used in rate calculation.

All rates in this monograph are crude rates. See Section V for age-adjusted rates.

AREA DAY RATE is the number of days of hospitalization per 1000 population accumulated by the population of the HSA.

AREA DISCHARGE RATE is the number of discharges per 1000 population accumulated in the HSA.

HOSP. SHARE DAYS is the percentage of days accumulated by the HSA population that were at this hospital.

HOSP. SHARE DISCH is the percentage of discharges of residents of the HSA that were from this hospital.

HOSP. TOTAL DAYS is the total number of patient days recorded at this hospital regardless of patient origin.

HOSP. TOTAL DISCH is the total number of discharges from this hospital regardless of patient origin.

PERCENT FROM HSA is the portion of all discharges from this hospital who were residents of this HSA.

PERCENT WITH DIAG. is the portion of all discharges from this hospital in the indicated diagnostic category.

AVERAGE LENGTH OF STAY - AREA is the average number of days per discharge for all residents of this HSA, regardless of hospital.

AVERAGE LENGTH OF STAY - HOSP is the average number of days per discharge for all users of this hospital, regardless of origin.

\*Sex-specific population used in rate calculation.

AREA DAY RATE is the number of days of hospitalization per 1000 population accumulated by the population of the HSA.

AREA DISCHARGE RATE is the number of discharges per 1000 population accumulated in the HSA.

HOSP. SHARE DAYS is the percentage of days accumulated by the HSA population that were at this hospital.

HOSP. SHARE DISCH is the percentage of discharges of residents of the HSA that were from this hospital.

HOSP. TOTAL DAYS is the total number of patient days recorded at this hospital regardless of patient origin.

HOSP. TOTAL DISCH is the total number of discharges from this hospital regardless of patient origin.

PERCENT FROM HSA is the portion of all discharges from this hospital who were residents of this HSA.

PERCENT WITH DIAG. is the portion of all discharges from this hospital in the indicated diagnostic category.

AVERAGE LENGTH OF STAY - AREA is the average number of days per discharge for all residents of this HSA, regardless of hospital.

AVERAGE LENGTH OF STAY - HOSP is the average number of days per discharge for all users of this hospital, regardless of origin.

VA data is missing for 6 months - July 1, 2006 - Dec 31, 2006.

\*Sex-specific population used in rate calculation.

This table includes Vermont residents only.

Use of HSA definitions based on 1997-2001 immediate care inpatient discharges began in 2002. Numbers reported here are not directly comparable to those published before 2002. See the User's Guide to Inpatient Tables for details.

%Cases is the percent of all cases from this hospital service area which were discharged from this hospital. %SURG is the percent of cases from this HSA and hospital which had a surgical procedure. Total of individual MDCs may not equal ALL DIAGNOSES due to missing MDC values.

The Veterans Administration is missing 6 months of data - July 1, 2006 - Dec. 31, 2006.

This table includes Vermont residents only.

Use of HSA definitions based on 1997-2001 immediate care inpatient discharges began in 2002. Numbers reported here are not directly comparable to those published before 2002. See the User's Guide to Inpatient Tables for details.

%Cases is the percent of all cases from this hospital service area which were discharged from this hospital. %SURG is the percent of cases from this HSA and hospital which had a surgical procedure. Total of individual MDCs may not equal ALL DIAGNOSES due to missing MDC values.

The Veterans Administration is missing 6 months of data - July 1, 2006 - Dec. 31, 2006.

This table includes Vermont residents only.

Use of HSA definitions based on 1997-2001 immediate care inpatient discharges began in 2002. Numbers reported here are not directly comparable to those published before 2002. See the User's Guide to Inpatient Tables for details.

%Cases is the percent of all cases from this hospital service area which were discharged from this hospital. %SURG is the percent of cases from this HSA and hospital which had a surgical procedure. Total of individual MDCs may not equal ALL DIAGNOSES due to missing MDC values.

The Veterans Administration is missing 6 months of data - July 1, 2006 - Dec. 31, 2006.

This table includes Vermont residents only.

Use of HSA definitions based on 1997-2001 immediate care inpatient discharges began in 2002. Numbers reported here are not directly comparable to those published before 2002. See the User's Guide to Inpatient Tables for details.

%Cases is the percent of all cases from this hospital service area which were discharged from this hospital. %SURG is the percent of cases from this HSA and hospital which had a surgical procedure. Total of individual MDCs may not equal ALL DIAGNOSES due to missing MDC values.

The Veterans Administration is missing 6 months of data - July 1, 2006 - Dec. 31, 2006.

This table includes Vermont residents only.

Use of HSA definitions based on 1997-2001 immediate care inpatient discharges began in 2002. Numbers reported here are not directly comparable to those published before 2002. See the User's Guide to Inpatient Tables for details.

%Cases is the percent of all cases from this hospital service area which were discharged from this hospital. %SURG is the percent of cases from this HSA and hospital which had a surgical procedure. Total of individual MDCs may not equal ALL DIAGNOSES due to missing MDC values.

The Veterans Administration is missing 6 months of data - July 1, 2006 - Dec. 31, 2006.

This table includes Vermont residents only.

Use of HSA definitions based on 1997-2001 immediate care inpatient discharges began in 2002. Numbers reported here are not directly comparable to those published before 2002. See the User's Guide to Inpatient Tables for details.

%Cases is the percent of all cases from this hospital service area which were discharged from this hospital. %SURG is the percent of cases from this HSA and hospital which had a surgical procedure. Total of individual MDCs may not equal ALL DIAGNOSES due to missing MDC values.

The Veterans Administration is missing 6 months of data - July 1, 2006 - Dec. 31, 2006.

This table includes Vermont residents only.

Use of HSA definitions based on 1997-2001 immediate care inpatient discharges began in 2002. Numbers reported here are not directly comparable to those published before 2002. See the User's Guide to Inpatient Tables for details.

%Cases is the percent of all cases from this hospital service area which were discharged from this hospital. %SURG is the percent of cases from this HSA and hospital which had a surgical procedure. Total of individual MDCs may not equal ALL DIAGNOSES due to missing MDC values.

The Veterans Administration is missing 6 months of data - July 1, 2006 - Dec. 31, 2006.

This table includes Vermont residents only.

Use of HSA definitions based on 1997-2001 immediate care inpatient discharges began in 2002. Numbers reported here are not directly comparable to those published before 2002. See the User's Guide to Inpatient Tables for details.

%Cases is the percent of all cases from this hospital service area which were discharged from this hospital. %SURG is the percent of cases from this HSA and hospital which had a surgical procedure. Total of individual MDCs may not equal ALL DIAGNOSES due to missing MDC values.

The Veterans Administration is missing 6 months of data - July 1, 2006 - Dec. 31, 2006.

This table includes Vermont residents only.

Use of HSA definitions based on 1997-2001 immediate care inpatient discharges began in 2002. Numbers reported here are not directly comparable to those published before 2002. See the User's Guide to Inpatient Tables for details.

%Cases is the percent of all cases from this hospital service area which were discharged from this hospital. %SURG is the percent of cases from this HSA and hospital which had a surgical procedure. Total of individual MDCs may not equal ALL DIAGNOSES due to missing MDC values.

The Veterans Administration is missing 6 months of data - July 1, 2006 - Dec. 31, 2006.

This table includes Vermont residents only.

Use of HSA definitions based on 1997-2001 immediate care inpatient discharges began in 2002. Numbers reported here are not directly comparable to those published before 2002. See the User's Guide to Inpatient Tables for details.

%Cases is the percent of all cases from this hospital service area which were discharged from this hospital. %SURG is the percent of cases from this HSA and hospital which had a surgical procedure. Total of individual MDCs may not equal ALL DIAGNOSES due to missing MDC values.

The Veterans Administration is missing 6 months of data - July 1, 2006 - Dec. 31, 2006.

This table includes Vermont residents only.

Use of HSA definitions based on 1997-2001 immediate care inpatient discharges began in 2002. Numbers reported here are not directly comparable to those published before 2002. See the User's Guide to Inpatient Tables for details.

%Cases is the percent of all cases from this hospital service area which were discharged from this hospital. %SURG is the percent of cases from this HSA and hospital which had a surgical procedure. Total of individual MDCs may not equal ALL DIAGNOSES due to missing MDC values.

The Veterans Administration is missing 6 months of data - July 1, 2006 - Dec. 31, 2006.

This table includes Vermont residents only.

Use of HSA definitions based on 1997-2001 immediate care inpatient discharges began in 2002. Numbers reported here are not directly comparable to those published before 2002. See the User's Guide to Inpatient Tables for details.

%Cases is the percent of all cases from this hospital service area which were discharged from this hospital. %SURG is the percent of cases from this HSA and hospital which had a surgical procedure. Total of individual MDCs may not equal ALL DIAGNOSES due to missing MDC values.

The Veterans Administration is missing 6 months of data - July 1, 2006 - Dec. 31, 2006.

				NH-Hitchcock	2	100.0	0.0	NH-Hitchcock	2	100.0	0.0				

This table includes Vermont residents only.

Use of HSA definitions based on 1997-2001 immediate care inpatient discharges began in 2002. Numbers reported here are not directly comparable to those published before 2002. See the User's Guide to Inpatient Tables for details.

%Cases is the percent of all cases from this hospital service area which were discharged from this hospital. %SURG is the percent of cases from this HSA and hospital which had a surgical procedure. Total of individual MDCs may not equal ALL DIAGNOSES due to missing MDC values.

The Veterans Administration is missing 6 months of data - July 1, 2006 - Dec. 31, 2006.

Totals are for resident and nonresident discharges in Vermont hospitals excluding the VA.

## APPENDIX A Definitions and Formulae

**Average Length of Stay (ALOS):** The arithmetic mean days of stay in hospital for the selected group of discharges:

$$\text{Avg. Length of Stay} = \frac{\text{Total Number of Patient Days in the Selected Group}}{\text{Total Number of Discharges in the Selected Group}}$$

**Charges:** Charges in this report are defined as hospital "facility" charges that are calculated by subtracting professional fees and patient convenience items charges from the total charge. However, facility charge data are not always reported according to the strict definition and some hospitals may have included salaried and contracted physician fees in their facility charges.

**Clinical Classifications Software (CCS) Grouper:** CCS was developed at the Agency for Healthcare Research and Quality (AHRQ) and is available at the website: <http://www.ahrq.gov/data/hcup/ccs.htm>. CCS collapses principal diagnosis and procedure codes into meaningful categories. The single-level diagnosis CCS aggregates illnesses and conditions into more than 260 categories. Similarly, the single-level procedure CCS aggregates procedures into 231 categories, most representing single types of procedures. High level CCS groups further collapse single-level CCS into broad groups based on body systems or condition categories.

**Diagnosis:** The condition, determined after study, which occasioned the patient's admission to the hospital. The accuracy or reliability of the diagnosis depends on several factors including the physician's understanding of the problem and the recorder's ability to fit this to established coding conventions. For those cases with multiple problems, the primary diagnosis may not be the reason for surgery or cause of death.

**Diagnosis Related Group (DRG):** A classification system that groups patient discharges into more than 500 categories according to diagnosis, type of treatment, age, and other relevant criteria. Under the prospective payment system, hospitals are paid a set fee for treating Medicare beneficiaries in a single DRG category, regardless of the actual cost of care for the individual. See Appendix C for a complete listing of DRGs.

**Discharge:** The equivalent of a hospital admission, except that for a specified time period, only those cases discharged are counted. Note that discharges do not necessarily reflect disease incidence or prevalence, just the fact of utilization of the hospital resource. Maternal records are included, but newborn records are excluded from the inpatient dataset, to avoid duplicate counts. However, newborn records are retained in the Vermont Uniform Hospital Discharge Dataset.

**Emergency Department (ED) Dataset:** Consists of all records that had an associated revenue code beginning 45 (Emergency Room).

**Hospital Service Area (HSA):** A group of Vermont ZipTowns (see definition of ZipTown below) based on each ZipTown's use of hospital resources. Starting in 2002, HSAs are based on inpatient discharges, where the diagnosis indicated the need for immediate care, for the years 1997-2001. In this fourth version of HSAs, ZipTowns were assigned to HSAs based on a plurality rule. Prior definitions of HSAs have been based on all inpatient stays (except for newborns) and have used a strict decision rule for inclusion of Zip Towns in a hospital's service area. Use of a strict inclusion rule meant that there were always towns that were not assigned to any HSA and were labeled "contested." In this fourth version of HSAs, no towns are considered contested. See the Introduction for a map of HSAs and the User's Guide to Inpatient Tables for an in-depth discussion of ZipTowns and HSAs.

Two HSAs contain more than one hospital: White River Junction (Dartmouth Hitchcock Medical Center, Mt. Ascutney Hospital, and the

Veterans Administration Hospital) and Brattleboro (Brattleboro Memorial Hospital and Grace Cottage Hospital).

**Inpatient Dataset:** Consists of discharge records that were billed as an inpatient stay. Maternal records are included, but newborns are excluded, to avoid duplicate counts. However, newborn records are retained in the Vermont Uniform Hospital Discharge Dataset.

**Major Diagnostic Category (MDC):** The aggregation of DRGs into 25 groups that define major body systems. See Appendices B and C for a list of MDCs and related DRGs.

**Market Share:** An individual hospital's share of the total hospital utilization of a given area, expressed as a percentage.

**Outpatient Procedures Dataset:** Consists of outpatient records with a procedure in the ICD-9-CM code range of 00.0-86.00 that were performed in an operating room, ambulatory surgery area, or other outpatient setting.

**Patient Day:** A stay in hospital for all or part of a day.

**Population-based Rate:** The rate of a population's use of hospital inpatient services. Rates in this report represent hospital discharges or days per 1,000 population for the selected group.

The *crude rate* is calculated as follows:

Crude Rate per 1,000 People	=	$\frac{\text{Number of Discharges or Patient DaysFor the Selected Group}}{\text{Total Population for the Selected Group}} \times 1,000$
--------------------------------	---	---

These rates depend upon the accuracy of both the numerator and the denominator population. Data on population-at-risk (the denominator in these rates) are based on estimates. Rates for small areas or for groups with small numerators should be used with caution.

**Age adjusted rates** are particularly important for comparisons across areas because service areas have different population age mixes and age is a strong factor influencing hospitalization patterns. The age-adjusted rate for a given hospital service area is calculated by multiplying the area's age specific rate for each age group by the state population in that age group, summing across age groups, and dividing the result by the total state population. This result is then multiplied by 1,000. The following age groups are used in this volume for the computation of age-adjusted rates: 0-4, 5-14, 15-24, 25-34, 35-44, 45-54, 55-64, 65-69, 70-74, 75-79, and 80+. In other publications such as the Monograph Companion, different standards, such as the projected year 2000 U.S. population, are used for age adjusting and different age groupings may also be used in the age adjusting process.

**Principal Payer:** The anticipated principal source of payment of the patient's hospital bill recorded by the hospital on each discharge record.

**ZipTown Grouping:** The combination of towns into groups with compatible town and Zip code boundaries to reconcile discrepancies between mailing address and town of residence. Towns are also grouped to achieve a minimum population of 1000 persons in each Zip Town group. ZipTowns were updated in 1996, with minor adjustments in 2004. This volume reflects these changes.

**APPENDIX B**  
**Major Diagnostic Categories (MDCs)**

- 1 Diseases and disorders of the nervous system
- 2 Diseases and disorders of the eye
- 3 Diseases and disorders of the ear, nose, mouth and throat
- 4 Diseases and disorders of the respiratory system
- 5 Diseases and disorders of the circulatory system
- 6 Diseases and disorders of the digestive system
- 7 Diseases and disorders of the hepatobiliary system (liver) and pancreas
- 8 Diseases and disorders of the musculoskeletal system and connective tissue
- 9 Diseases and disorders of the skin, subcutaneous tissue and breast
- 10 Endocrine, nutritional and metabolic diseases and disorders
- 11 Diseases and disorders of the kidney and urinary tract
- 12 Diseases and disorders of the male reproductive system
- 13 Diseases and disorders of the female reproductive system
- 14 Pregnancy, childbirth, and the puerperium
- 15 Newborns and other neonates with conditions originating in the perinatal period  
--excluded from tables in this monograph
- 16 Diseases and disorders of the blood and blood-forming organs and immunological disorders
- 17 Myeloproliferative diseases and disorders and poorly differentiated neoplasms
- 18 Infectious and parasitic diseases
- 19 Mental diseases and disorders
- 20 Alcohol/drug use and alcohol/drug-induced organic mental disorders
- 21 Injuries, poisonings, and toxic effects of drugs
- 22 Burns
- 23 Factors influencing health status and other contacts with health services
- 24 Multiple significant trauma
- 25 Human immunodeficiency virus infections

## APPENDIX C

### Major Diagnostic Categories (MDCs) and Diagnosis Related Groups (DRGs), FY05-06 and FY06-07

M= Medical S= Surgical cc=complications or co-morbidity

#### MDC 1: Diseases and Disorders of the Nervous System

- 1 S Craniotomy age >17 w cc
- 2 S Craniotomy age >17 w/o cc
- 3 S Craniotomy age 0-17
- 6 S Carpal tunnel release
- 7 S Periph & cranial nerve & other nerv syst proc w cc
- 8 S Periph & cranial nerve & other nerv syst proc w/o cc
- 9 M Spinal disorders & injuries
- 10 M Nervous system neoplasms w cc
- 11 M Nervous systems neoplasms w/o cc
- 12 M Degenerative nervous system disorders
- 13 M Multiple sclerosis & cerebellar ataxia
- 14 M Intracranial hemorrhage & stroke w infarct
- 15 M Nonspecific CVA & precerebral occlusion w/o infarct
- 16 M Nonspecific cerebrovascular disorders w cc
- 17 M Nonspecific cerebrovascular disorders w/o cc
- 18 M Cranial & peripheral nerve disorders w cc
- 19 M Cranial & peripheral nerve disorders w/o cc
- 20\* M Nervous system infection except viral meningitis
- 21 M Viral meningitis
- 22 M Hypertensive encephalopathy
- 23 M Nontraumatic stupor & coma
- 24\* M Seizure & headache age >17 w cc
- 25\* M Seizure & headache age >17 w/o cc
- 26 M Seizure & headache age 0-17
- 27 M Traumatic stupor & coma, coma >1 hr
- 28 M Traumatic stupor & coma, coma <1 hr, age >17 w cc
- 29 M Traumatic stupor & coma, coma <1 hr age >17 w/o cc
- 30 M Traumatic stupor & coma, coma <1 hr age 0-17
- 31 M Concussion age >17 w cc
- 32 M Concussion age >17 w/o cc
- 33 M Concussion age 0-17
- 34 M Other disorders of nervous system w cc
- 35 M Other disorders of nervous system w/o cc
- 524 M Transient ischemia
- 528 S Intracranial vascular proc w PDX hemorrhage

- 529 S Ventricular shunt procedures w cc
- 530 S Ventricular shunt procedures w/o cc
- 531 S Spinal procedures w cc
- 532 S Spinal procedures w cc
- 533 S Extracranial procedures w cc
- 534 S Extracranial procedures w cc
- 543 S Craniotomy w device implant or acute complex CNS PDX
- 559 M Acute ischemic stroke with use of thrombolytic agent

#### The following DRGs were added to MDC 1 as of 10/1/2006:

- 560 M Baterial & tuberculous infections of nervous system
- 561 M Non-baterial infections of nervous system except viral meningitis
- 562 M Seizure age>17 w cc
- 563 M Seizure Age >17 w/o cc
- 564 M Headaches age >17
- 577 S Carotid artery stent procedure

#### MDC 2: Diseases and Disorders of the Eye

- 36 S Retinal procederes
- 37 S Orbital procederes
- 38 S Primary iris procederes
- 39 S Lens procederes w or w/o vitrectomy
- 40 S Extraocular procederes except orbit age >17
- 41 S Extraocular procederes except orbit age 0-17
- 42 S Intraocular procederes except retina, iris & lens
- 43 M Hyphema
- 44 M Acute major eye infections
- 45 M Neurological eye disorders
- 46 M Other disorders of the eye age >17 w cc
- 47 M Other disorders of the eye age >17 w/o cc
- 48 M Other disorders or the eye age 0-17

#### MDC 3: Diseases and Disorders of the Ear, Nose, Mouth, and Throat

- 49 S Major head & neck procederes
- 50 S Sialoadenectomy
- 51 S Salivary gland procederes except sialoadenectomy
- 52 S Cleft lip & palate repair

**APPENDIX C**

**Major Diagnostic Categories (MDCs) and Diagnosis Related Groups (DRGs), FY05-06 and FY06-07**

**M= Medical S= Surgical cc=complications or co-morbidity**

- 53 S Sinus & mastoid procedures age >17
- 54 S Sinus & mastoid procedures age 0-17
- 55 S Miscellaneous ear, nose, mouth & throat procedures
- 56 S Rhinoplasty
- 57 S T&A proc except tonsillectomy &/or adenoidectomy only age >17
- 58 S T&A proc except tonsillectomy &/or adenoidectomy only age 0-17
- 59 S Tonsillectomy &/or adenoidectomy only age >17
- 60 S Tonsillectomy &/or adenoidectomy only age 0-17
- 61 S Myringotomy w tube insertion age >17
- 62 S Myringotomy w tube insertion age 0-17
- 63 S Other ear, nose, mouth & throat O.R. procedures
- 64 M Ear, nose, mouth & throat malignancy
- 65 M Dysequilibrium
- 66 M Epistaxis
- 67 M Epiglottitis
- 68 M Otitis media & URI age >17 w cc
- 69 M Otitis media & URI age >17 w/o cc
- 70 M Otitis media & URI age 0-17
- 71 M Laryngotracheitis
- 72 M Nasal trauma & deformity
- 73 M Other ear, nose, mouth & throat diagnoses age >17
- 74 M Other ear, nose, mouth & throat diagnoses age 0-17
- 168 S Mouth procedures w cc
- 169 S Mouth procedures w/o cc
- 185 M Dental & oral dis except extractions & restorations age >17
- 186 M Dental & oral dis except extractions & restorations age 0-17
- 187 M Dental extractions & restorations

**MDC 4: Diseases and Disorders of the Respiratory System**

- 75 S Major chest procedures
- 76 S Other resp system O.R. procedures w cc
- 77 S Other resp system O.R. procedures w/o cc
- 78 M Pulmonary embolism
- 79 M Respiratory infections & inflammations age >17 w cc
- 80 M Respiratory infections & inflammations age >17 w/o cc
- 81 M Respiratory infections & inflammations age 0-17

- 82 M Respiratory neoplasms
- 83 M Major chest trauma w cc
- 84 M Major chest trauma w/o cc
- 85 M Pleural effusion with cc
- 86 M Pleural effusion w/o cc
- 87 M Pulmonary edema & respiratory failure
- 88 M Chronic obstructive pulmonary disease
- 89 M Simple pneumonia & pleurisy age >17 w cc
- 90 M Simple pneumonia & pleurisy age >17 w/o cc
- 91 M Simple pneumonia & pleurisy age 0-17
- 92 M Interstitial lung disease w cc
- 93 M Interstitial lung disease w/o cc
- 94 M Pneumothorax w cc
- 95 M Pneumothorax w/o cc
- 96 M Bronchitis & asthma age >17 w cc
- 97 M Bronchitis & asthma age >17 w/o cc
- 98 M Bronchitis & asthma age 0-17
- 99 M Respiratory signs & symptoms w cc
- 100 M Respiratory signs & symptoms w/o cc
- 101 M Other respiratory system diagnoses w cc
- 102 M Other respiratory system diagnoses w/o cc
- 475\* M Respiratory system diagnosis w ventilator support

**The following DRGs were added to MDC 4 as of 10/1/2006:**

- 565 M Respiratory system diagnosis w ventilator support 96+ hours
- 566 M Respiratory system diagnosis w ventilator support <96 hours

**MDC 5: Diseases and Disorders of the Circulatory System**

- 104 S Cardiac valve & oth major cardiothoracic proc w cardiac cath
- 105 S Cardiac valve & oth major cardiothoracic proc w/o cardiac cath
- 106 S Coronary bypass w PTCA
- 108 S Other cardiothoracic procedures
- 110 S Major cardiovascular procedures w cc
- 111 S Major cardiovascular procedures w/o cc
- 113 S Amputation for circ system disorders except upper limb & toe
- 114 S Upper limb & toe amputation for circ system disorders
- 117 S Cardiac pacemaker revision except device replacement

**APPENDIX C**

**Major Diagnostic Categories (MDCs) and Diagnosis Related Groups (DRGs), FY05-06 and FY06-07**

**M= Medical S= Surgical cc=complications or co-morbidity**

118 S Cardiac pacemaker device replacement  
 119 S Vein ligation & stripping  
 120 S Other circulatory system O.R. procedures  
 121 M Circulatory disorders w AMI & major comp disch alive  
 122 M Circulatory disorders w AMI w/o major comp disch alive  
 123 M Circulatory disorders w AMI, expired  
 124 M Circulatory disorders except AMI w card cath & complex diag  
 125 M Circulatory disorders except AMI w card cath w/o complex diag  
 126 M Acute & subacute endocarditis  
 127 M Heart failure & shock  
 128 M Deep vein thrombophlebitis  
 129 M Cardiac arrest, unexplained  
 130 M Peripheral vascular disorders w cc  
 131 M Peripheral vascular disorders w/o cc  
 132 M Atherosclerosis w cc  
 133 M Atherosclerosis w/o cc  
 134 M Hypertension  
 135 M Cardiac congenital & valvular disorders age >17 w cc  
 136 M Cardiac congenital & valvular disorders age >17 w/o cc  
 137 M Cardiac congenital & valvular disorders age 0-17  
 138 M Cardiac arrhythmia & conduction disorders w cc  
 139 M Cardiac arrhythmia & conduction disorders w/o cc  
 140 M Angina pectoris  
 141 M Syncope & collapse w cc  
 142 M Syncope & collapse w/o cc  
 143 M Chest pain  
 144 M Other circulatory system diagnoses w cc  
 145 M Other circulatory system diagnoses w/o cc  
 479 S Other vascular procedures w/o cc  
 515 S Cardiac defibrillator implant w/o cardiac cath  
 518 S Percutaneous cardiovasc proc w/o coronary artery stent or AMI  
 525 S Other heart assist system implant  
 535 S Cardiac defib implant w cardiac cath w AMI/HF/shock  
 536 S Cardiac defib implant w cardiac cath w/o AMI/HF/shock  
 547 S Coronary bypass w cardiac cath w maj cv dx  
 548 S Coronary bypass w cardiac cath wo maj cv dx

549 S Coronary bypass w/o cardiac cath w maj cv dx  
 550 S Coronary bypass w/o cardiac cath w/o maj cv dx  
 551 S Permanent cardiac pacemaker impl w maj cv dx or ACID lead  
 552 S Other permanent cardiac pacemaker w/o maj cv dx  
 553 S Other vascular procedures w cc maj cv dx  
 554 S Other vascular procedures w cc w/o maj cv dx  
 555 S Percutaneous cardiovascular proc w maj cv dx  
 556 S Percut cardiovasc proc w non drug eluting stent w/o maj cv dx  
 557 S Percut cardiovasc proc w drug eluting stent w maj cv dx  
 558 S Percut cardiovasc proc w drug eluting stent w/o maj cv dx

**MDC 6: Diseases and Disorders of the Digestive System**

146 S Rectal resection w cc  
 147 S Rectal resection w/o cc  
 148\* S Major small & large bowel procedures w cc  
 149 S Major small & large bowel procedures w/o cc  
 150 S Peritoneal adhesiolysis w cc  
 151 S Peritoneal adhesiolysis w/o cc  
 152 S Minor small & large bowel procedures w cc  
 153 S Minor small & large bowel procedures w/o cc  
 154\* S Stomach, esophageal & duodenal procedures age > 17 w cc  
 155 S Stomach, esophageal & duodenal procedures age > 17 w/o cc  
 156 S Stomach, esophageal & duodenal procedures age 0-17  
 157 S Anal & stomal procedures w cc  
 158 S Anal & stomal procedures w/o cc  
 159 S Hernia procedures except inguinal & femoral age >17 w cc  
 160 S Hernia procedures except inguinal & femoral age >17 w/o cc  
 161 S Inguinal & femoral hernia procedures age >17 w cc  
 162 S Inguinal & femoral hernia procedures age >17 w/o cc  
 163 S Hernia procedures age 0-17  
 164 S Appendectomy w complicated principal diag w cc  
 165 S Appendectomy w complicated principal diag w/o cc  
 166 S Appendectomy w/o complicated principal diag w cc  
 167 S Appendectomy w/o complicated principal diag w/o cc  
 170 S Other digestive system O.R. procedures w cc  
 171 S Other digestive system O.R. procedures w/o cc

**APPENDIX C**

**Major Diagnostic Categories (MDCs) and Diagnosis Related Groups (DRGs), FY05-06 and FY06-07**

**M= Medical S= Surgical cc=complications or co-morbidity**

- 172 M Digestive malignancy w cc
- 173 M Digestive malignancy w/o cc
- 174 M G.I. hemorrhage w cc
- 175 M G.I. hemorrhage w/o cc
- 176 M Complicated peptic ulcer
- 177 M Uncomplicated peptic ulcer w cc
- 178 M Uncomplicated peptic ulcer w/o cc
- 179 M Inflammatory bowel disease
- 180 M G.I. obstruction w cc
- 181 M G.I. obstruction w/o cc
- 182 M Esophagitis, gastroent & misc digest disorders age >17 w cc
- 183 M Esophagitis, gastroent & misc digest disorders age >17 w/o cc
- 184 M Esophagitis, gastroent & misc digest disorders age 0-17
- 188 M Other digestive system diagnoses age >17 w cc
- 189 M Other digestive system diagnoses age >17 w/o cc
- 190 M Other digestive system diagnoses age 0-17

**The following DRGs were added to MDC 6 as of 10/1/2006:**

- 567 S Stomach, esophageal & duodenal proc age >17 w cc w major gi dx
- 568 S Stomach, esophageal & duodenal proc age >17 w cc wo major gi dx
- 569 S Major small & large bowel proc w cc w major gi dx
- 570 S Major small & large bowel proc w cc w/o major gi dx
- 571 M Major esophageal disorders
- 572 M Major gastrointestinal disorders and peritoneal infections

**MDC 7: Diseases and Disorders of the Hepatobiliary (Liver) System and Pancreas**

- 191 S Pancreas, liver & shunt procedures w cc
- 192 S Pancreas, liver & shunt procedures w/o cc
- 193 S Biliary tract proc except only cholecyst w or w/o C.D.E. w cc
- 194 S Biliary tract proc except only cholecyst w or w/o C.D.E. w/o cc
- 195 S Cholecystectomy w C.D.E. w cc
- 196 S Cholecystectomy w C.D.E. w/o cc
- 197 S Cholecystectomy except by laparoscope w/o C.D.E. w cc
- 198 S Cholecystectomy except by laparoscope w/o C.D.E. w/o cc
- 199 S Hepatobiliary diagnostic procedure for malignancy

- 200 S Hepatobiliary diagnostic procedure for non-malignancy
- 201 S Other hepatobiliary or pancreas O.R. procedures
- 202 M Cirrhosis & alcoholic hepatitis
- 203 M Malignancy of hepatobiliary system or pancreas
- 204 M Disorders of pancreas except malignancy
- 205 M Disorders of liver except malig, cirr, alc hepa w cc
- 206 M Disorders of liver except malig, cirr, alc hepa w/o cc
- 207 M Disorders of the biliary tract w cc
- 208 M Disorders of the biliary tract w/o cc
- 493 S Laparoscopic cholecystectomy w/o C.D.E. w cc
- 494 S Laparoscopic cholecystectomy w/o C.D.E. w/o cc

**MDC 8: Diseases and Disorders of the Musculoskeletal System and Connective Tissue**

- 210 S Hip & femur procedures except major joint age >17 w cc
- 211 S Hip & femur procedures except major joint age >17 w/o cc
- 212 S Hip & femur procedures except major joint age 0-17
- 213 S Amputation for musculoskeletal system & conn tissue disorders
- 216 S Biopsies of musculoskeletal system & connective tissue
- 217 S Wnd debrid & skn grft except hand, for muscskel & conn tiss dis
- 218 S Lower extrem & humer proc except hip, foot, femur age >17 w cc
- 219 S Lower extrem & humer proc except hip, foot, femur age >17 w/o cc
- 220 S Lower extrem & humer proc except hip, foot, femur age 0-17
- 223 S Major shoulder/elbow proc, or other upper extremity proc w cc
- 224 S Shoulder, elbow or forearm proc, exc major joint proc, w/o cc
- 225 S Foot procedures
- 226 S Soft tissue procedures w cc
- 227 S Soft tissue procedures w/o cc
- 228 S Major thumb or joint proc, or oth hand or wrist proc w cc
- 229 S Hand or wrist proc, except major joint proc, w/o cc
- 230 S Local excision & removal of int fix devices of hip & fumur
- 231 S Local excision & removal of int fix devices except hip & femur
- 232 S Arthroscopy
- 233 S Other musculoskelet sys & conn tiss O.R. proc w cc
- 234 S Other musculoskelet sys & conn tiss O.R. proc w/o cc
- 235 M Fractures of femur

**APPENDIX C**

**Major Diagnostic Categories (MDCs) and Diagnosis Related Groups (DRGs), FY05-06 and FY06-07**

**M= Medical S= Surgical cc=complications or co-morbidity**

236	M	Fractures of hip & pelvis	545	S	Revision of hip or knee replacement
237	M	Sprains, strains & dislocations of hip, pelvis & thigh	546	S	Spinal fusion exc cerv with curvature of the spine or malig
238	M	Osteomyelitis			
239	M	Pathological fractures & musculoskeletal & conn tiss malignancy			<b>MDC 9: Diseases and Disorders of the Skin, Subcutaneous Tissue and Breast</b>
240	M	Connective tissue disorders w cc	257	S	Total mastectomy for malignancy w cc
241	M	Connective tissue disorders w/o cc	258	S	Total mastectomy for malignancy w/o cc
242	M	Septic arthritis	259	S	Subtotal mastectomy for malignancy w cc
243	M	Medical back problems	260	S	Subtotal mastectomy for malignancy w/o cc
244	M	Bone diseases & specific arthropathies w cc	261	S	Breast proc for non-malignancy except biopsy & local excision
245	M	Bone diseases & specific arthropathies w/o cc	262	S	Breast biopsy & local excision for non-malignancy
246	M	Non-specific arthropathies	263	S	Skin graft &/or debrid for skin ulcer or cellulitis w cc
247	M	Signs & symptoms of musculoskeletal system & conn tissue	264	S	Skin graft &/or debrid for skin ulcer or cellulitis w/o cc
248	M	Tendonitis, myositis & bursitis	265	S	Skin graft &/or debrid except for skin ulcer or cellulitis w cc
249	M	Aftercare, musculoskeletal system & connective tissue	266	S	Skin graft &/or debrid except for skin ulcer or cellulitis w/o cc
250	M	Fx, sprn, strn & disl of forearm, hand, foot age >17 w cc	267	S	Perianal & pilonidal procedures
251	M	Fx, sprn, strn & disl of forearm, hand, foot age >17 w/o cc	268	S	Skin, subcutaneous tissue & breast plastic procedures
252	M	Fx, sprn, strn & disl of forearm, hand, foot age 0-17	269	S	Other skin, subcut tiss & breast procedure w cc
253	M	Fx, sprn, strn & disl of uparm, lowleg ex foot age >17 w cc	270	S	Other skin, subcut tiss & breast procedure w/o cc
254	M	Fx, sprn, strn & disl of uparm, lowleg ex foot age >17 w/o cc	271	M	Skin ulcers
255	M	Fx, sprn, strn & disl of uparm, lowleg ex foot age 0-17	272	M	Major skin disorders w cc
256	M	Other musculoskeletal system & connective tissue diagnoses	273	M	Major skin disorders w/o cc
471	S	Bilateral or multiple major joint procs of lower extremity	274	M	Malignant breast disorders w cc
491	S	Major joint & limb reattachment procedures of upper extremity	275	M	Malignant breast disorders w/o cc
496	S	Combined anterior/posterior spinal fusion	276	M	Non-malignant breast disorders
497	S	Spinal fusion except cervical w cc	277	M	Cellulitis age >17 w cc
498	S	Spinal fusion except cervical w/o cc	278	M	Cellulitis age >17 w/o cc
499	S	Back & neck procedures except spinal fusion w cc	279	M	Cellulitis age 0-17
500	S	Back and neck procedures except spinal fusion w/o cc	280	M	Trauma to the skin, subcut tiss & breast age >17 w cc
501	S	Knee procedures w primary diagnosis of infection w cc	281	M	Trauma to the skin, subcut tiss & breast age >17 w/o cc
502	S	Knee procedures w primary diagnosis of infection w/o cc	282	M	Trauma to the skin, subcut tiss & breast age 0-17
503	S	Knee procedures w/o primary diagnosis of infection	283	M	Minor skin disorders w cc
519	S	Cervical spinal fusion w cc	284	M	Minor skin disorders w/o cc
520	S	Cervical spinal fusion w/o cc			
537	S	Local excis & remov of int fix dev except hip & femur w cc			<b>MDC 10: Endocrine, Nutritional and Metabolic Diseases and Disorders</b>
538	S	Local excis & remov of int fix dev except hip & femur w/o cc	285	S	Amputat of lower limb for endocrine, nutrit, & metabol disorders
544	S	Major joint replacement or reattachment of lower extremity			

**APPENDIX C**

**Major Diagnostic Categories (MDCs) and Diagnosis Related Groups (DRGs), FY05-06 and FY06-07**

**M= Medical S= Surgical cc=complications or co-morbidity**

- 286 S Adrenal & pituitary procedures
- 287 S Skin grafts & wound debrid for endoc, nutrit & metab disorders
- 288 S O.R. procedures for obesity
- 289 S Parathyroid procedures
- 290 S Thyroid procedures
- 291 S Thyroglossal procedures
- 292 S Other endocrine, nutrit & metab O.R. proc w cc
- 293 S Other endocrine, nutrit & metab O.R. proc w/o cc
- 294 M Diabetes age >35
- 295 M Diabetes age 0-35
- 296 M Nutritional & misc metabolic disorders age >17 w cc
- 297 M Nutritional & misc metabolic disorders age >17 w/o cc
- 298 M Nutritional & misc metabolic disorders age 0-17
- 299 M Inborn errors of metabolism
- 300 M Endocrine disorders w cc
- 301 M Endocrine disorders w/o cc

- 320 M Kidney & urinary tract infections age >17 w cc
- 321 M Kidney & urinary tract infections age >17 w/o cc
- 322 M Kidney & urinary tract infections age 0-17
- 323 M Urinary stones w cc. &/or ESW lithotripsy
- 324 M Urinary stones w/o cc
- 325 M Kidney & urinary tract signs & symptoms age >17 w cc
- 326 M Kidney & urinary tract signs & symptoms age >17 w/o cc
- 327 M Kidney & urinary tract signs & symptoms age 0-17
- 328 M Urethral stricture age >17 w cc
- 329 M Urethral stricture age >17 w/o cc
- 330 M Urethral stricture age 0-17
- 331 M Other kidney & urinary tract diagnoses age >17 w cc
- 332 M Other kidney & urinary tract diagnoses age >17 w/o cc
- 333 M Other kidney & urinary tract diagnoses age 0-17

**The following DRG was added to MDC 11 as of 10/1/2006:**

- 573 S Major bladder procedures

**MDC 11: Diseases and Disorders of the Kidney and Urinary Tract**

- 302 S Kidney transplant
- 303 S Kidney and Ureter Procedures for Neoplasm
- 304 S Kidney and Ureter Procedures for Non-neoplasm with CC
- 305 S Kidney and Ureter Procedures for Non-neoplasm without CC
- 306 S Prostatectomy w cc
- 307 S Prostatectomy w/o cc
- 308 S Minor bladder procedures w cc
- 309 S Minor bladder procedures w/o cc
- 310 S Transurethral procedures w cc
- 311 S Transurethral procedures w/o cc
- 312 S Urethral procedures, age >17 w cc
- 313 S Urethral procedures, age >17 w/o cc
- 314 S Urethral procedures, age 0-17
- 315 S Other kidney & urinary tract O.R. procedures
- 316 M Renal failure
- 317 M Admit for renal dialysis
- 318 M Kidney & urinary tract neoplasms w cc
- 319 M Kidney & urinary tract neoplasms w/o cc

**MDC 12: Diseases and Disorders of the Male Reproductive System**

- 334 S Major male pelvic procedures w cc
- 335 S Major male pelvic procedures w/o cc
- 336 S Transurethral prostatectomy w cc
- 337 S Transurethral prostatectomy w/o cc
- 338 S Testes procedures, for malignancy
- 339 S Testes procedures, non-malignancy age >17
- 340 S Testes procedures, non-malignancy age 0-17
- 341 S Penis procedures
- 342 S Circumcision age >17
- 343 S Circumcision age 0-17
- 344 S Other male reproductive system O.R. proc for malignancy
- 345 S Other male reproductive system O.R. proc except for malignancy
- 346 M Malignancy, male reproductive system, w cc
- 347 M Malignancy, male reproductive system, w/o cc
- 348 M Benign prostatic hypertrophy w cc
- 349 M Benign prostatic hypertrophy w/o cc
- 350 M Inflammation of the male reproductive system
- 351 M Sterilization, male

**APPENDIX C**

**Major Diagnostic Categories (MDCs) and Diagnosis Related Groups (DRGs), FY05-06 and FY06-07**

**M= Medical S= Surgical cc=complications or co-morbidity**

- 352 M Other male reproductive system diagnoses
- MDC 13: Diseases and Disorders of the Female Reproductive System**
- 353 S Pelvic evisceration, radical hysterectomy & radical vulvectomy
- 354 S Uterine, adnexa proc for non-ovarian/adnexal malig w cc
- 355 S Uterine, adnexa proc for non-ovarian/adnexal malig w/o cc
- 356 S Female reproductive system reconstructive procedures
- 357 S Uterine & adnexa proc for ovarian or adnexal malig
- 358 S Uterine & adnexa proc for non-malignancy w cc
- 359 S Uterine & adnexa proc for non-malignancy w/o cc
- 360 S Vagina, cervix & vulva procedures
- 361 S Laparoscopy & incisional tubal interruption
- 362 S Endoscopic tubal interruption
- 363 S D&c, conization & radio-implant, for malignancy
- 364 S D&c, conization except for malignancy
- 365 S Other female reproductive system O.R. procedures
- 366 M Malignancy, female reproductive system w cc
- 367 M Malignancy, female reproductive system w/o cc
- 368 M Infections, female reproductive system
- 369 M Menstrual & other female reproductive system disorders

**MDC 14: Pregnancy, Childbirth, and the Puerperium**

- 370 S Cesarean section w cc
- 371 S Cesarean section w/o cc
- 372 M Vaginal delivery w complicating diagnoses
- 373 M Vaginal delivery w/o complicating diagnoses
- 374 S Vaginal delivery w sterilization &/or D&C
- 375 S Vaginal delivery w O.R. proc except steril &/or D&C
- 376 M Postpartum & post abortion diagnoses w/o O.R. procedure
- 377 S Postpartum & post abortion diagnoses w O.R. procedure
- 378 M Ectopic pregnancy
- 379 M Threatened abortion
- 380 M Abortion w/o D&C
- 381 S Abortion w D&C, aspiration curettage or hysterotomy
- 382 M False labor
- 383 M Other antepartum diagnoses w medical complications
- 384 M Other antepartum diagnoses w/o medical complications

**MDC 15: Newborns and Other Neonates with Conditions Originating in the Perinatal Period — Excluded from Inpatient tables**

- 385 M Neonates, died or transferred to another acute care facility
- 386 M Extreme immaturity or respiratory distress syndrome, neonate
- 387 M Prematurity w major problems
- 388 M Prematurity w/o major problems
- 389 M Full term neonate w major problems
- 390 M Neonate w other significant problems
- 391 M Normal newborn

**MDC 16: Diseases and Disorders of the Blood and Blood Forming Organs and Immunological Disorders**

- 392 S Splenectomy age >17
- 393 S Splenectomy age 0-17
- 394 S Other O.R. procedures of the blood and blood forming organs
- 395 M Red blood cell disorders age >17
- 396 M Red blood cell disorders age 0-17
- 397 M Coagulation disorders
- 398 M Reticuloendothelial & immunity disorders w cc
- 399 M Reticuloendothelial & immunity disorders w/o cc

**The following DRG was added to MDC 16 as of 10/1/2006:**

- 574 M Major hematologic/immunologic diag exc sickle cell crisis & coagul

**MDC 17: Myeloproliferative Diseases and Disorders and Poorly Differentiated Neoplasms**

- 401 S Lymphoma & non-acute leukemia w other O.R. proc w cc
- 402 S Lymphoma & non-acute leukemia w other O.R. proc w/o cc
- 403 M Lymphoma & non-acute leukemia w cc
- 404 M Lymphoma & nonacute leukemia w/o cc
- 405 M Acute leukemia w/o major O.R. procedure age 0-17
- 406 S Myeloprolif disord or poorly diff neopl w maj O.R. proc w cc
- 407 S Myeloprolif disord or poorly diff neopl w maj O.R. proc w/o cc
- 408 S Myeloprolif disord or poorly diff neopl w other O.R. proc
- 409 M Radiotherapy
- 410 M Chemotherapy w/o acute leukemia as secondary diagnosis
- 411 M History of malignancy w/o endoscopy

**APPENDIX C**

**Major Diagnostic Categories (MDCs) and Diagnosis Related Groups (DRGs), FY05-06 and FY06-07**

**M= Medical S= Surgical cc=complications or co-morbidity**

- 412 M History of malignancy w endoscopy
- 413 M Other myeloprolif dis or poorly diff neopl diag with cc
- 414 M Other myeloprolif dis or poorly diff neopl diag w/o cc
- 473 M Acute leukemia w/o major O.R. procedure age >17
- 492 M Chemotherapy w acute leukemia or w hi dose chemo
- 539 S Lymphoma & leukemia w major O.R. procedure w cc
- 540 S Lymphoma & leukemia w major O.R. procedure w/o cc

**MDC 18: Infectious and Parasitic Diseases (Systemic or Unspecified Sites)**

- 415\* S O.R. procedure for infectious & parasitic diseases
- 416\* M Septicemia age >17
- 417 M Septicemia age 0-17
- 418 M Postoperative & post-traumatic infections
- 419 M Fever of unknown origin age >17 w cc
- 420 M Fever of unknown origin age >17 w/o cc
- 421 M Viral illness age >17
- 422 M Viral illness & fever of unknown origin age 0-17
- 423 M Other infectious & parasitic diseases diagnoses

**The following DRGs were added to MDC 18 as of 10/1/2006:**

- 575 M Septicemia w mv96+ hours age >17
- 576 M Septicemia w/o mv96+ hours age >17
- 578 S Infectious & parasitic diseases w OR procedure
- 579 S Postoperative or post-traumatic infections w OR procedure

**MDC 19: Mental Diseases and Disorders**

- 424 S O.R. procedure w principal diagnoses of mental illness
- 425 M Acute adjustment reaction & psychosocial dysfunction
- 426 M Depressive neuroses
- 427 M Neuroses except depressive
- 428 M Disorders of personality & impulse control
- 429 M Organic disturbances & mental retardation
- 430 M Psychoses
- 431 M Childhood mental disorders
- 432 M Other mental disorder diagnoses

**MDC 20: Alcohol/Drug Use and Alcohol/Drug Induced Organic Mental Disorders**

- 433 M Alc/drug abuse or dependence, left against medical advice
- 521 M Alc/drug abuse or dependence w cc
- 522 M Alc/drug abuse or depend w rehabilitation therapy w/o cc
- 523 M Alc/drug abuse or depend w/o rehabilitation therapy w/o cc

**MDC 21: Injuries, Poisonings, and Toxic Effects of Drugs**

- 439 S Skin grafts for injuries
- 440 S Wound debridements for injuries
- 441 S Hand procedures for injuries
- 442 S Other O.R. procedures for injuries w cc
- 443 S Other O.R. procedures for injuries w/o cc
- 444 M Traumatic injury age >17 w cc
- 445 M Traumatic injury age >17 w/o cc
- 446 M Traumatic injury age 0-17
- 447 M Allergic reactions age >17
- 448 M Allergic reactions age 0-17
- 449 M Poisoning & toxic effects of drugs age >17 w cc
- 450 M Poisoning & toxic effects of drugs age >17 w/o cc
- 451 M Poisoning & toxic effects of drugs age 0-17
- 452 M Complications of treatment w cc
- 453 M Complications of treatment w/o cc
- 454 M Other injury, poisoning & toxic effect diag w cc
- 455 M Other injury, poisoning & toxic effect diag w/o cc

**MDC 22: Burns**

- 504 S Extensive 3rd degree burn w skin graft
- 505 M Extensive third degree burn w/o skin graft
- 506 S Full thickness burn w skin graft or inh inj w cc or sign trauma
- 507 S Full thickness burn w skin graft or inh inj w/o cc or sign trauma
- 508 M Full thickness burn w/o skin graft or inh inj w cc or sign trauma
- 509 M Full thickness burn w/o skin graft or inh inj w/o cc or sign trauma
- 510 M Non-extensive burns w cc or significant trauma
- 511 M Non-extensive burns w/o cc or significant trauma

**APPENDIX C**

**Major Diagnostic Categories (MDCs) and Diagnosis Related Groups (DRGs), FY05-06 and FY06-07**

**M= Medical S= Surgical cc=complications or co-morbidity**

**MDC 23: Factors Influencing Health Status and Other Contacts with Health Services**

- 461 S O.R. proc w diagnoses of other contact w health services
- 462 M Rehabilitation
- 463 M Signs & symptoms w cc
- 464 M Signs & symptoms w/o cc
- 465 M Aftercare w history of malignancy as secondary diagnosis
- 466 M Aftercare w/o history of malignancy as secondary diagnosis
- 467 M Other factors influencing health status

- 482 S Tracheostomy for face, mouth & neck diagnoses
- 495 S Lung transplant
- 512 S Simultaneous pancreas/kidney transplant
- 513 S Pancreas transplant
- 541 S ECMO or trach w mech vent 96+ hrs or PDX except face, mouth & neck w maj OR
- 542 S Trach w mech vent 96+ hrs or PDX except face, mouth & neck w/o maj OR

**MDC 24: Multiple Significant Trauma**

- 484 S Craniotomy for multiple significant trauma
- 485 S Limb reattachment, hip & femur proc for multiple sign trauma
- 486 S Other O.R. procedures for multiple significant trauma
- 487 M Other multiple significant trauma

**DRGs Assigned to More than One MDC**

- 468 Extensive O.R. procedure unrelated to principal diagnosis
- 469 Principal diagnosis invalid as discharge diagnosis
- 470 Ungroupable
- 476 S Prostatic O.R. procedure unrelated to principal diagnosis
- 477 S Non-extensive O.R. procedure unrelated to principal diagnosis

**MDC 25: Human Immunodeficiency Virus Infections**

- 488 S HIV w extensive O.R. procedure
- 489 M HIV w major related condition
- 490 M HIV w or w/o other related condition

**\*No Longer Valid after 10/1/2006**

- 20 Replaced with 560 and 561
- 24 Replaced with 562, 563, and 564
- 25 Replaced with 562, 563 and 564
- 148 Replaced with 569 and 570
- 154 Replaced with 567 and 568
- 415 Replaced with 578 and 579
- 416 Replaced with 575 and 576
- 475 Replaced with 565 and 566

**Pre-MDC**

- 103 S Heart transplant
- 480 S Liver transplant
- 481 S Bone marrow transplant

**APPENDIX D**  
**Hospitals in this Report**

Vermont Acute Care Hospitals  
(Abbreviations are used in Sections III and IV)

Brattleboro Memorial Hospital  
(BRAT)  
17 Belmont Avenue  
Brattleboro, Vermont 05301

Central Vermont Medical Center  
(CVMC)  
P.O. Box 547  
Barre, Vermont 05641

Copley Hospital  
(COPL)  
528 Washington Highway  
Morrisville, Vermont 05661

Fletcher Allen Health Care  
(FAHC)  
111 Colchester Avenue  
Burlington, Vermont 05401

Gifford Medical Center  
(GIFF)  
44 Main Street, P.O. Box 2000  
Randolph, Vermont 05060

Grace Cottage Hospital  
(GRAC)  
Route 35, P.O. Box 216  
Townshend, Vermont 05353

Mt. Ascutney Hospital and Health Center  
(MT.A)  
289 County Road  
Windsor, Vermont 05089

North Country Hospital  
(NCTY)  
189 Prouty Drive  
Newport, Vermont 05855

Northeastern Vermont Regional Hospital  
(NEVT)  
1315 Hospital Drive, P.O. Box 905  
St. Johnsbury, Vermont 05819

Northwestern Medical Center  
(NWST)  
133 Fairfield Street, P.O. Box 1370  
St. Albans, Vermont 05478

Porter Medical Center  
(PORT)  
115 Porter Drive  
Middlebury, Vermont 05753

Rutland Regional Medical Center  
(RRMC)  
160 Allen Street  
Rutland, Vermont 05701

Southwestern Vermont Medical Center  
(SWVT)  
100 Hospital Drive East  
Bennington, Vermont 05201

Springfield Hospital  
(SPRF)  
25 Ridgewood Road, P.O. Box 2003  
Springfield, Vermont 05156

The Veterans Administration Medical  
and Regional Office Center (V.A.)  
215 North Main Street  
White River Junction, Vermont 05009

**APPENDIX D**  
**Hospitals in this Report**

New Hampshire Hospitals  
(Abbreviations are used in Section VIII)

Alice Peck Day Memorial Hospital  
(NH-Alice Day)  
Lebanon, New Hampshire

Androscoggin Valley Hospital  
(NH-Androscoggin)  
Berlin, New Hampshire

Catholic Medical Center  
(NH-Catholic)  
Manchester, New Hampshire

Cheshire Medical Center  
(NH-Cheshire)  
Keene, New Hampshire

Concord Hospital  
(NH-Concord)  
Concord, New Hampshire

Cottage Hospital  
(NH-Cottage)  
Woodsville, New Hampshire

Dartmouth Hitchcock Medical Center  
(NH-Hitchcock)  
Lebanon, New Hampshire

Dartmouth Hitchcock Psychiatric Unit  
(NH-Hitch. Psych)  
Lebanon, New Hampshire

Elliot Hospital  
(NH-Elliot)  
Manchester, New Hampshire

Exeter Hospital  
(NH-Exeter)  
Exeter, New Hampshire

Franklin Regional Hospital  
(NH-Franklin)  
Franklin, New Hampshire

Frisbie Memorial Hospital  
(NH-Frisbie)  
Rochester, New Hampshire

Huggins Hospital  
(NH-Huggins)  
Wolfeboro, New Hampshire

Lakes Region General Hospital  
(NH-Lakes Region)  
Laconia, New Hampshire

Littleton Hospital  
(NH-Littleton)  
Littleton, New Hampshire

Memorial Hospital  
(NH-Memorial)  
North Conway, New Hampshire

Monadnock Community Hospital  
(NH-Monadnock)  
Peterborough, New Hampshire

New London Hospital  
(NH-New London)  
New London, New Hampshire

Parkland Medical Center  
(NH-Parkland)  
Derry, New Hampshire

Portsmouth Regional Hospital  
(NH-Portsmouth)  
Portsmouth, New Hampshire

Southern New Hampshire Medical Center  
(NH-Southern NH)  
Nashua, New Hampshire

St. Joseph's Hospital  
(NH-St. Joseph's)  
Nashua, New Hampshire

Speare Memorial Hospital  
(NH-Speare)  
Plymouth, New Hampshire

Upper Connecticut Valley Hospital  
(NH-Upper CT Val)  
Colebrook, New Hampshire

Valley Regional Hospital  
(NH-Valley Reg.)  
Claremont, New Hampshire

Weeks Medical Center Hospital  
(NH-Weeks)  
Lancaster, New Hampshire

Wentworth-Douglass Hospital  
(NH-Wntwth-Doug)  
Dover, New Hampshire

**APPENDIX D**  
**Hospitals in this Report**

Massachusetts Hospitals Most Frequently Used by Vermont Residents  
(Abbreviations are used in Section VIII)

Baystate Medical Center  
(MA-Baystate)  
Springfield, Massachusetts

Berkshire Medical Center  
(MA-Berkshire)  
Pittsfield, Massachusetts

Beth Israel Deaconess Medical Center  
(MA-Beth Israel)  
Boston, Massachusetts

Brigham and Women's Hospital  
(MA-Brigham)  
Boston, Massachusetts

Children's Hospital Boston  
(MA-Children's)  
Boston, Massachusetts

Cooley Dickinson Hospital  
(MA-Cooley Dicki)  
Northampton, Massachusetts

Dana-Farber Cancer Institute  
(MA-Dana Farber)  
Boston, Massachusetts

Franklin Medical Center  
(MA-Franklin Med)  
Greenfield, Massachusetts

Hillcrest Hospital  
(MA-Hillcrest)  
Pittsfield, Massachusetts

Lahey Clinic Hospital  
(MA-Lahey)  
Burlington, Massachusetts

Massachusetts Eye and Ear Infirmary  
(MA-MA Eye & Ear)  
Boston, Massachusetts

Massachusetts General Hospital  
(MA-MA General)  
Boston, Massachusetts

New England Baptist Hospital  
(MA-N.E. Baptist)  
Boston, Massachusetts

Newton-Wellesley Hospital  
(MA-Newton Wells)  
Newton, Massachusetts

North Adams Regional Hospital  
(MA-North Adams)  
North Adams, Massachusetts

Northampton VA Medical Center  
(MA-Northampton)  
Northampton, Massachusetts

Tufts-New England Medical Center  
(MA-N.E. Med Ctr)  
Boston, Massachusetts

UMass Memorial Medical Center  
(MA-U Mass)  
Worcester, Massachusetts

VA Boston Healthcare—Boston Division  
(MA-Boston VA)  
Boston, Massachusetts

VA Boston Healthcare—Brockton Division  
(MA-Brockton VA)  
Brockton, Massachusetts

Other Massachusetts hospitals are grouped together in Section VIII.

**APPENDIX D**  
**Hospitals in this Report**

New York Hospitals Most Frequently Used by Vermont Residents  
(Abbreviations are used in Section VIII)

Albany Medical Center Hospital  
(NY-Albany)  
Albany, New York

Mary McClellan Hospital  
(NY-McClellan)  
Cambridge, New York

Phelps Memorial Hospital Center  
(NY-Phelps)  
Sleepy Hollow, New York

Champlain Valley Physicians Hospital  
Medical Center (NY-Champ Val)  
Plattsburgh, New York

Memorial Hospital for Cancer and Allied  
Disorders (NY-Hosp for CA)  
New York, New York

Samaritan Hospital  
(NY-Samaritan)  
Troy, New York

Columbia Presbyterian Medical Center  
(NY-Presbyterian)  
New York, New York

Moses-Ludington Hospital  
(NY-Moses-Luding)  
Ticonderoga, New York

St. Peters Hospital  
(NY-St Peters)  
Albany, New York

Glens Falls Hospital  
(NY-Glens Falls)  
Glens Falls, New York

New York United Hospital Medical Center  
(NY-United Med C.)  
Port Chester, New York

Leonard Hospital  
(NY-Leonard)  
Troy, New York

New York Weill Cornell Medical Center  
(NY-New York)  
New York, New York

Other New York hospitals are grouped  
together in Section VIII.

**APPENDIX E**  
**Towns and Hospitals in Vermont Hospital Service Areas**  
**Based on 1997-2001 Vermont Resident Immediate Care Inpatient Discharges**

**BARRE** – Central Vermont Medical Center

Calais+	Montpelier+	Moretown	Waitsfield+	Williamstown+
Calais	Barre City	Northfield+	Fayston	Washington
Woodbury	Barre Town	Northfield	Waitsfield	Williamstown
Worcester	Berlin	Roxbury	Warren	
Marshfield+	East Montpelier	Plainfield	Waterbury+	
Cabot	Middlesex	Topsham	Bolton	
Marshfield	Montpelier		Duxbury	
	Orange		Waterbury	

**BENNINGTON** – Southwestern Vermont Medical Center

Arlington+	Bennington+	Dorset+	Manchester	Whitingham
Arlington	Bennington	Dorset	Readsboro+	Wilmington+
Sandgate	Glastenbury	Rupert	Readsboro	Searsburg
Sunderland	Pownal	Dover+	Stamford	Wilmington
	Shaftsbury	Dover		
	Woodford	Somerset		

**BRATTLEBORO** – Brattleboro Memorial Hospital, Grace Cottage Hospital

Brattleboro+	Jamaica+	Newfane+	Vernon
Brattleboro	Jamaica	Brookline	Westminster+
Dummerston	Stratton	Newfane	Putney
Guilford	Wardsboro	Townshend	Westminster
Halifax	Winhall	Windham	
Marlboro			

+ Indicates an aggregated ZipTown group used in Sections III and IV.

Use of Hospital Service Area definitions based on 1997-2001 immediate care inpatient discharges began in 2002.

Therefore, numbers reported here are not directly comparable to those published prior to 2002.

**APPENDIX E**  
**Towns and Hospitals in Vermont Hospital Service Areas**  
**Based on 1997-2001 Vermont Resident Immediate Care Inpatient Discharges**

**BURLINGTON** – Fletcher Allen Health Care

Burlington	Fairfax	Huntington+	Milton	Westford

Newark			
Victory			

+ Indicates an aggregated ZipTown group used in Sections III and IV.

Use of Hospital Service Area definitions based on 1997-2001 immediate care inpatient discharges began in 2002.

Therefore, numbers reported here are not directly comparable to those published prior to 2002.

**APPENDIX E**  
**Towns and Hospitals in Vermont Hospital Service Areas**  
**Based on 1997-2001 Vermont Resident Immediate Care Inpatient Discharges**

WHITE RIVER JUNCTION – Dartmouth Hitchcock Medical Center, Mt. Ascutney Hospital and Health Center, and the Veterans Administration Medical Center

Bradford	Fairlee+	Hartford+	Ryegate	Windsor+
Bridgewater+	Fairlee	Hartford	Sharon	West Windsor
Bridgewater	Vershire	Pomfret	Thetford+	Windsor
Plymouth	West Fairlee	Hartland	Strafford	Woodstock
Reading	Groton+	Newbury	Thetford	
Corinth	Groton	Norwich	Tunbridge	
	Peacham	Royalton		

+ Indicates an aggregated ZipTown group used in Sections III and IV.

Use of Hospital Service Area definitions based on 1997-2001 immediate care inpatient discharges began in 2002.

Therefore, numbers reported here are not directly comparable to those published prior to 2002.

**APPENDIX F**  
**Vermont Hospital Discharge Data Elements**  
**Public / Non-Public Data Elements and Availability of Data Elements in Datasets**

Attribute	Description	Public Use Data Element	Inpatient Dataset	Outpatient Dataset	Emergency Dept. Dataset
Admission Date		N	Y	Y	Y
Admission Hour		N	Y	Y	Y
Admission Source	Transfer, referral, newborn and court/law enforcement categories	Y	Y	Y	Y
Admission Type	Emergency, urgent, elective, newborns	Y	Y	Y	Y
Age	Single-year age at discharge	N	Y	Y	Y
Age Groups	Under 1, 1-17, 18-24, 25-29, 30-34, 35-39, 40-44, 45-49, 50-54, 55-59, 60-64, 65-69, 70-74, 75 and over	Y	Y	Y	Y
Ambulatory Flag	Record having any procedure in the 00.00 - 86.99 range This flag not used for inpatient records	Y	N	Y	Y
Attending physician	Hospital-specific code for attending physician at time of discharge	N	Y	Y	Y
Bill Type	Bill type as designated by the hospital	Y	Y	Y	Y
Birth Weight	Birth weight of newborns in grams	N	Y	N	N
Charges	Total facility charges. See description in Appendix A.	Y	Y	Y	Y
Clinical Classifications Software (CCS) Single Level Diagnosis Groups	Principal diagnosis collapsed into more than 260 categories. See description in Appendix A.	Y	Y	Y	Y
Clinical Classifications Software (CCS) High Level Diagnosis Groups	CCS single level diagnosis groups collapsed into 18 high level categories. See description in Appendix A.	Y	Y	Y	Y
Clinical Classifications Software (CCS) Single Level Procedure Groups	Principal procedure collapsed into 231 categories. See description in Appendix A.	Y	Y	Y	Y

**APPENDIX F**  
**Vermont Hospital Discharge Data Elements**  
**Public / Non-Public Data Elements and Availability of Data Elements in Datasets**

Attribute	Description	Public Use Data Element	Inpatient Dataset	Outpatient Dataset	Emergency Dept. Dataset
Clinical Classifications Software (CCS) High Level Procedure Groups	CCS single level procedure groups collapsed into 16 high level categories. See description in Appendix A.	Y	Y	Y	Y
County-Town Code	Patient county and town of residence with first two digits representing the county and the second two digits the town.	N	Y	Y	Y
Critical Access Hospital	Coded for VT hospitals only	Y	Y	Y	Y
Date of Birth		N	Y	Y	Y
Diagnosis Related Group (DRG)	Medicare classification system that groups inpatient discharges into more than 500 categories based on diagnosis, type of treatment, age and other relevant criteria. See listing in Appendix C.	Y	Y	N	N
Discharge Date		N	Y	Y	Y
Discharge Status	Categories indicating destination and type of services required at time of discharge, left against medical advice, or death	Y	Y	Y	Y
Ecode	Code for external causes of injury and poisoning; primary Ecode appears in this field, secondary Ecodes may be entered as secondary diagnoses	Y	Y	Y	Y
ERFLAG	Set to 1 if record has an associated revenue code beginning 45, Emergency Room.	Y	Y	Y	Y
Grouper	Grouper used to assign DRG and MDC	Y	Y	Y	Y
Hospital		Y	Y	Y	Y
Hospital Service Area	A grouping of Vermont ZipTowns see definition of ZipTown below) based on each ZipTown's use of hospital resources. See description in Appendix A.	Y	Y	Y	Y

**APPENDIX F**  
**Vermont Hospital Discharge Data Elements**  
**Public / Non-Public Data Elements and Availability of Data Elements in Datasets**

Attribute	Description	Public Use Data Element	Inpatient Dataset	Outpatient Dataset	Emergency Dept. Dataset
Major Diagnostic Category (MDC)	An aggregation of DRGs (see definition of DRGs above) into 25 groups that define major body systems. See listing Appendix B.	Y	Y	N	N
Other Physician 1 & 2	Hospital-specific code for other physicians performing procedures	N	Y	Y	Y
Patient Days	Length of stay; maximum 255 days	Y	Y	Y	Y
Patient Type	Hospital setting from which patient was discharged. Includes inpatient (I), outpatient procedure (A), observation bed (O), series patient (X) and emergency department (E). Not available 2006+	Y	Y	Y	Y
Primary Payer	The anticipated principal source of payment for the patient's hospital bill as coded by the hospital.	Y	Y	Y	Y
Principal and Secondary Procedure Dates	Date of procedure.	N	Y	Y	Y
Principal Diagnosis and Up to 19 Secondary Diagnoses	ICD-9-CM diagnosis code.	Y	Y	Y	Y
Principal Procedure and Up to 19 Secondary Procedures	ICD-9-CM procedure code.	Y	Y	Y	Y
Race		N	Y	Y	Y
Readmission indicator	Any patient readmitted to the same hospital within 30 days	N	Y	Y	Y
Same Day Flag	Admission and discharge were on the same day. Not an overnight stay.	Y	Y	Y	N
Sex		Y	Y	Y	Y
Special Care Unit Days	Number of days spent in a special care unit	Y	Y	N	N

**APPENDIX F**  
**Vermont Hospital Discharge Data Elements**  
**Public / Non-Public Data Elements and Availability of Data Elements in Datasets**

Attribute	Description	Public Use Data Element	Inpatient Dataset	Outpatient Dataset	Emergency Dept. Dataset
Year of Discharge		Y	Y	Y	Y
ZIP Code	5-digit ZIP code	N	Y	Y	Y
ZIP Code Groups	3-digit ZIP for most of Vermont ; combined 058 and 059 area; 5-digit ZIP for areas with a population over 10,000 in Vermont and combined zips in other states	Y	Y	Y	Y
ZipTown Code	Groups of towns that share ZIP code(s). See description in User's Guide to Inpatient Monograph Tables and Appendix A.	N	Y	Y	Y

Public use data for resident and non-resident discharges from Vermont hospitals are available by calendar year. To order, contact:

Vermont Department of Health  
Public Health Statistics  
108 Cherry Street, PO Box 70  
Burlington, VT 05402-0070  
(802) 863-7300 or (800) 869-2871

Non-public data elements are available for research purposes only. To request non-public data elements, contact:

Division of Health Care Administration  
89 Main Street, Drawer 20  
Montpelier, VT 05620-3601  
(802) 828-2900 or (800) 631-7788
