Novavax: us.novavaxcovidvaccine.com/hcp

COVID-19 Beyond Use Dates (BUD)

Date a COVID-19 vaccine* is viable through, once removed from permanent storage.

Pfizer: 10 weeks after removal from ultracold

- ✓ Direct Ship: **Store in a monitored refrigerator. No Freezer Storage.**
- ✓ 10-week BUD starts when placed in the refrigerator.

Moderna: 30 days after removal from a standard freezer

- ✓ Direct Ship: **May store in a monitored freezer through expiry.**
- ✓ 30-day BUD starts when placed in the refrigerator. **Never Refreeze.**

Depot Deliveries: **Always store in a monitored refrigerator.** BUD is noted on the delivery log.

BUDs are not in VIMS. Use space below to document who is responsible for monitoring expirations and BUD and how your office tracks these dates.

*Pertains to mRNA vaccine only. Novavax does not have a BUD and is good in the refrigerator through expiration.
